Graduation, job-searching, moving in.

College life provided an over-abundance of

transitions

for students. Seniors *s w e a t e d* what
life would bring after graduation while
freshmen *f r e t t e d* about new rooms,
new roommates, and new classes.

Residents of the new University Commons
w o n d e r e d whether construction

would be finished in time to move in, while
the library assistants worked frantically
s c a n n i n g books into the new computer system.

Despite student and faculty *o b j e c t i o n s* ,
changes continued to occur throughout the
year, for *b e t t e r* or for *w o r s e* .

--Amy Tarlton

Whether it was deciding to join Pep Band
or Gospel Choir or to attend Dimensions or
not, students faced a whole new set of
decisions when making the transition to
college or to the real world. Most
students considered college one of the many

rites of passage

and found themselves changing fashions,
attitudes, and even friends.

Some of the changes happened on campus
as Freshmen Orientation changed,
on- and off-campus ministries expanded,
and skate-boarding was banned in
areas on campus. Residents of the
apartments, all 144 of them, learned
there was more to apartment living
than private rooms. Dishes had to
be washed, floors vacuumed and a
whole chore list had to be made.

Whatever the changes, students were
willing to face them to start a new phase of life.

SPRING FEVER

OR Bust

With spring fever came thoughts of the spring formal and graduation.

Bad haircuts. Torn dresses.

These events echoed the theme of the "Once in a Blue Moon" spring formal.

SEA chair Kim McVey turned the LYCC into a sea of blues and turquoise for the event. Jennifer Carlton was honored as the 1997 Spring Formal Queen. Students danced and enjoyed jumbo shrimp cocktail.

The night was an unforgettable one to many students. David Petro said, "I was cutting my hair and messed up. I ended up cutting it shorter than I intended."

Corie Lewis had to make emergency dress repairs at dinner. "My dress was strapless with rhinestones attached to a neck piece. The rhinestones began popping off, so I did a quick sewing job. But by the end of the dance only one side was still completely attached."

Melissa Brown said, "At the

restaurant a guy came up to us with a bottle of ketchup and squeezed it. Fortunately, it was a fake bottle, but I was so mad I almost cussed."

By the end of April, the only thing on some students' minds was

Some people were so proud of their graduates that they gave once-in-a-lifetime presents.

"My parents gave me a 1997 Honda CRV."

-- Nikol McKinney

graduation. The studying, sacrificing, and praying finally paid off. The awaited day arrived. Feelings of pride and excitement filled the air as family and friends offered congratulations and gifts.

Graduation was a time of celebration that graduates used to visit with their families, to shop, to party, and to take trips. Paula Head Roach went shopping with her family while longtime friends Christy Clayton, Jennifer Burton, Tamela Fox, and Tamara Cox took a trip to Charleston.

Despite the worry over prom appearance and final exams, spring semester of 1997 was one worth remembering.

by Jamie Taylor

NEW RULES, new games, *New faces*

Orientation. The word itself conjured up negative thoughts for most freshmen. With all of the struggles of moving in and experiencing new-found freedom, who wanted to deal with sessions of rules and regulations?

However, most freshmen found that Orientation was not only helpful, but it was also fun. Holly Stowe said, "I thought Orientation was a great opportunity to meet new people and experience college life gradually."

Obviously, some informative sessions had to be included, but they were offset by a variety of fun activities such as Bulldog Madness, a new addition to Orientation. Although she enjoyed most activities, Jondra Harmon said of one game, "I never want to crawl under anyone's legs again."

The Big Brothers and Big Sisters

helped move in freshmen and make them feel comfortable. Big Brother Nate Hoffman said, "One of the first memories I have of GW is of the Big Brothers. When I arrived, I didn't have to move anything in. They carried all my things in for me. I decided that I wanted to do the same thing for incoming freshmen."

"Big Brothers and Big Sisters are the hidden track on the CD of life."

--Matt Walton

had a different perspective. Nick Harrell said, "I think it was a good attempt to welcome students into a warm environment, but there were too many days prior to classes when nothing happened."

by Jordana Hart

After being given their assignment, an orientation group strategizes over who has what in the scavenger hunt. Team games such as the scavenger hunt were designed to promote unity and to encourage the freshmen to work together for a common goal.

LIVING LIFE

uncommonly well at *University Commons*

They said it couldn't be done. Residents of the new University Commons wondered if the apartments would be done in time to

move in for the fall semester. In fact the timing was very close.

Upper-classmen who helped out with Freshmen Orientation were stalled from moving in for a couple of days.

By September there were reports that some things still did not work in the apartments.

Some residents had problems with clogged toilets, microwave doors falling off, and garbage disposals not working. Contractors were still doing repairs throughout the fall semester.

Despite minor problems, residents of the apartments were more satisfied with the Commons than with the regular residence halls.

Those students who weren't so lucky to live in the apartments were not sure where they would end up. Because of an increase in enrollment, residence

halls were changed again. This year Mauney became a women's residence hall and Nanney became a men's residence hall.

Although students had some

reluctance at where they had been assigned at first, most realized that a residence hall was more than the building. Neighbors helped make life bearable in a less-than-ideal situation.

With internet wiring not quite

finished by August, some residents endured the sounds of drilling throughout the day. A walk through Decker gave proof of the labors of technology as blue cables hung from open ceiling panels.

After all the work was finished, students appreciated the efforts when they could log onto the internet at any time of the day from the comforts of their own rooms.

Each University Commons apartment has four bedrooms, two full bathrooms, a kitchen, a living area, and a washer and dryer. Students pay an additional \$600 per semester than students in residence halls.

by Amy Tarlton

COUNT DOWN, blast off, *star count*

Homecoming provided an opportunity for students to "Reach for the Stars."

The week's various activities allowed students' "star quality to shine." Students and faculty decked out in a wide array of garments to show their school spirit. Some dressed as twins or their favorite star, while others wore black and red clothes, inside-out clothes. Some went so far as to wear their pajamas.

All the fans of WWF Wrestling were given a treat Monday night as SEA sponsored a Nitro party in the cafe. A few of the biggest names in wrestling showed up for a personal appearance.

Tuesday night in the Dover Theater, students attended Comedy Sportz,

an improvization group for which the audience chose the scenarios. This was the first year the group had come to campus.

The Christian Ministries United provided Wednesday's night activities.

Thursday night in a concert on the quad, Gardner-Webb alumnus Carl Cartee performed with Moriah, which included another alumnus, Michael Kirby.

As alumni began to pour onto campus, activities were offered just for them, starting at 8 a.m. with

a golf tournament. T-Gate, or the Great Alumni Tent Event, offered music and refreshments in Lindsey Court later Friday night.

(continued on page 15)

"I thought this year was the best the quad had ever looked, but the street side looked a little weaker than years before."

**--Mickey Sharpe,
Director of**

Surrounding by proof of their efforts. Nathania Heckert, Bonnie Haynes, and Lori Moore stop to take a break from rolling the campus. For the first time in years, the Physical Plant did not begin cleaning up until the Monday after Homecoming. CMU provided a crew to pick up much of the paper Saturday afternoon. (PHOTO BY KAREN BROWER)

Getting the fans psyched up for the game, Matt Weathers, Tim Veeck, and Brian Burgess strut their stuff around the campfire. (PHOTO BY KAREN BROWER)

Working late into the night, Kelly Armstrong prepares posters for H.A.P.Y.'s dorm decorations. The decorations varied from Star Wars to Apollo. (PHOTO BY AMY TARLTON)

Running a play against the Bears, senior Carlton Hurt leads the team towards one more goal in the game. Hurt returned to football in his last semester after being a red-shirted quarterback in 1993. However he did play basketball for four years.

COUNT DOWN, blast off, *star count*

Homecoming continued from page 12

Role reversal ruled as the girls took over the football practice field for Power Puff. Since a football game is not the same without cheerleaders, the guys in drag were happy to oblige.

After a bonfire and a pep rally behind Myers-Spangler, it was time to compete with participants in the past years for the rolling of the campus.

While some students preferred the usual method of dragging a roll of toilet paper as they walked across campus, some people such as Kim McVey chose to roll the efficient way. McVey brought eighteen rolls of the economy size rolls of paper and a broomstick.

While two people held the broomstick holding three to four rolls of paper, another person grabbed the ends of the paper and ran across the quad. Within minutes, a blanket of white covered the quad.

By about 2 a.m. most students had seen enough of the toilet paper and were ready to call it a night and prepare for the next day's parade and game. However, some students were left to finish dorm decorations which were judged Saturday

morning. The residents of Myers-Spangler were rewarded for their efforts in decorating.

When the big day finally arrived, students, alumni, and guests enjoyed a picnic lunch at the observatory. Along with the meal, the band Crimson, a few clowns, and the cheerleaders provided entertainment for young and old.

By noon the parade was taking its traditional route down Main Street, Stadium Drive, and into the stadium.

At 1:30 the game began while a stadium full of fans baked in the hot October sun. At halftime class officers presented flowers to the Homecoming attendants: Janelle Sanders, freshman class; Tonya Clinksdales, sophomore class; Melinda Hokett, junior class; Brandy Perdue, senior attendant and Janet Jones, Homecoming queen.

The Bulldogs enjoyed an effortless win over Lenoir-Rhyne, beating them 32-0. With another "W" on the scoreboard, the students celebrated that night at the Homecoming dance.

by Candice Yoder and Jamie Taylor

BEHIND the masc-(ot)

Who do you know on campus with the most school spirit? If you think back carefully, you'd probably say that it was Mike Bass and Brandy Brandt, the mascots for the cheerleading squad.

"Be a bulldog; it's fun," Brandt said about her job.

Although she was not as experienced as Bass, who was behind the mask for the second year, Brandt said that she enjoyed being a mascot.

Brandt said, "LuLu Dawg is really old and we need new suits. That would make the job a lot more fun."

Bass agreed. "A lot more could be done if the female suit was new or could be fixed."

However both Brandy and Mike agreed that they loved their job even if it required them to wear hot, claustrophobic uniforms. And even if it took up enormous amounts of their time, it was worth it to pump up bulldog spirit.

"It's made me more outgoing and enthusiastic about the different sports. I get a rush when the fans cheer!" said Brandt.

The mascots not only cheered at football games, but also at basketball games.

Their efforts were rewarded at cheerleading camp when Bass and Brandt won All-American awards for their roles.

(PHOTO BY KAREN BROWER)

SWEEPING up the *pieces*

Bottles, paper, cans,....these were just a few of the items that lay on the banks of the Broad River Greenway. Then along came students, faculty, and community members to clean up the mess as part of a project known as the "Big Sweep."

When asked about the level of participation in "Big Sweep," Mark Dougherty said, "I was a little disappointed that more people didn't show up, but those that did worked hard. We were able to get a lot accomplished, but there is always more that can be done."

Shawn Montgomery said, "The Big Sweep was a great idea, and it is something I would like to see happen more often in today's society. It would be great if we could do something like Big

Sweep every few months instead of once a year."

In addition to the cleanup activities, students led activities at the Greenway in September and October. These activities included planting flowers and organizing hiking trips and building camp fires.

The activities at the Greenway would not have been possible had it not been for donations made by state and local governments and the community. All totaled, the donations were over \$100,000.

According to Harvey Hamrick, Director of Community Services, the university would like to be able to keep up its active participation in greenway activities in the future.

by Candice Yoder

CAR-GO OR *no-go*

Stowaway cats. Moving houses. Broken gas lines. The commute to school and back home could really be an adventure for some travelers. Commuters soon learned that they needed a good sense of humor in order to survive the ride.

April Burgess shared a story of one adventure on her way to school. She was in her car and in her usual mad dash to school when she heard a strange noise coming from the back seat. She glanced in the rearview mirror and saw her cat "freaking out." She had to turn around and take the panicked pet back home.

Everyone has gotten behind a slow-moving vehicle when there's only ten minutes to spare, and you're twenty minutes from your destination. Commuters constantly took a risk of "driving behind Methusalah," as Burgess said, or getting behind slow-moving tractors just to get class on time. Sometimes it was more than a tractor. Tracy Simpson recalled following a "house, not a mobile home being

moved." The house got stuck on the bridge on Highway 150.

Stranger things have happened. Some commuters recall having close encounters with deer and some with gas lines.

When a gas line burst near the library last spring, people were evacuated from Myers-Spangler, and the library. Along with those residents, commuters were inconvenienced because they were not allowed to crank their cars in the commuter parking lot for fear of sparking gas fumes.

A mother's work is never done and Gail Carrol still had to pick up her kids at school which required a creative way to get her car moving. A few good, strong Samaritans pushed her van to a safe distance from the leak and she was on her way.

Although there were few differences between commuters and residential students, commuters sometimes had more adventures getting to class.

ALL IN the family

People always say, "Family stick together" but following a sibling to college might be a little too close for comfort.

Sharing friends or cars were common situations that siblings had to deal with. Although it caused some competition, there was always a sibling cheering them on, whether they succeeded or not.

Why did you and your sibling decide to come to the same school?

Mary Kirkman-- "My sister claims she came here to play softball, but I really think she

just wanted to be around me. (Just kidding!)"

Rebekah Kirkman-- "I really didn't come here because my sister goes here. I got a scholarship for softball here. But it's been fun going to school with her.

Do you ever wish your sibling was not at this school? *Bobby Hokett--* "Sometimes, especially when you get into a fight over family issues in the middle of the cafe and everyone is watching."

Melinda Hokett-- "No! I love going to school with my brother! As a matter of fact, I hope my little brother comes here next year!"

Has being at the same college brought you closer or further apart?

Caleb Smith-- It really has not brought us closer together. For the most part we do not see each other very much because we have totally different schedules."

Danielle Smith-- "Being at the same college has brought us

both closer together because we know that we can be there for each other. To have a big brother is the most wonderful thing especially if you're having

"To have a big brother is the most wonderful thing especially if you're having a bad day."

--Danielle Smith

a bad day."

How does having a personal relationship between you and your girlfriend affected by having a sibling here?

Steven and James Short-- "No problems here because we are both single!"

When are you grateful that you and your sibling attend the same school?

Darryl Brown-- "It becomes real convenient for our parents not having to worry about us at different schools. They are able to visit us both of the same here."

Eric Brown-- "When you need help with a problem."

Although they share a brotherly love, Steven and James Short also share a friendly competition on the wrestling mat. (PHOTO BY STAFF)

Having a sibling close means there's always an opportunity to play fight, like Melinda and Bobby Hokett do. Occasionally there's an opportunity for a real fight. (PHOTO BY STAFF)

SHOWING compassion *world-wide*

For some students Dimensions is a free time, a time to study, socialize with friends or to catch some extra zzzz's. For some students Dimensions is a new experience.

So on September 2, during a Dimensions meeting, the speaker, Lori Salierno, had the undivided attention of the audience. Teary eyes and sniffles throughout the audience was the result of Salierno's presentation.

Lori Salierno is the Executive Director of Celebrate Life International and is a representative for Compassion International. Compassion International is an organization that sponsors children from Third World countries.

College students, well-known for being low on funds, joined with friends to adopt a child for \$24 a month. Getting together with friends made the

monthly \$24 less expensive.

When asked how this would effect the finances, Ruth Austin replied, "I don't go out to eat with my friends as much."

When young adults are turned loose in the college environment some believe that saving money will be a breeze. Some students found that it is not so easy to save money. Since adopting a child, Meredith Harper says, "I have learned to budget my money more wisely when I go shopping."

Compassion International allows poor children to feel loved and to be well fed and clothed, while at the same time demonstrating that there are young men and women on campus that are caring, compassionate, and unselfish despite their financial difficulties.

REFLECTING

student talents

To break the monotony of books and professors, the members of the Student Entertainment Association and the *Reflections* staff provided amusement for the student body.

Matt Elliot, chairman of SEA, said, "We try to provide a variety of events to keep the entire student body entertained."

The ideas for entertainment were spawned from the collaborative and creative minds of the SEA committee and sponsor, Audrey Sloan. Sloan said, "I am very pleased with the job they have done."

SEA sponsored events ranging from movies and dances to concerts. The November concert showcased the talents of Big Tent Revival, The Waiting, and Reality Check. The concert brought in over seven hundred people.

Bottom Shelf was a monthly night club and coffee house that met in Rich Banquet Hall. On the average, a hundred people showed up.

Reflections provided literary entertainment through a

literary journal and poetry reading for those more interested in reading.

The literary journal contained short stories and poems submitted by the student body. Each submission went through an editing and approval process before publication.

At the poetry readings, students read their own works in

front of students and faculty after approval from Ms. Carlile, the advisor.

The site of the poetry readings

varied from the Stroup lobby to the cafeteria or the Fireside Lounge, and quite often, coffee was also available. Matthew Miller, editor of the journal, said, "We tried to pick a different location for each reading so the participants and the audience would not get bored with the same surroundings."

It seemed that every week one of these organizations had something going on, leaving the student body anything but bored.

by Mandy Ellison

"They [SEA] went for a wide spectrum of event to include the whole student body."

PERFORMING as *ambassadors*

Music and community service work together in both the Gospel Choir and the Joyful Hands Sign Choir as members performed at local churches and rest homes.

In addition to weekend performances at churches in Georgia and Washington, D.C., the Gospel Choir hosted a Gospel Fest on campus which

drew groups from Florida, South Carolina, and North Carolina.

Also touring nearby communities, Joyful Hands signed at churches and Crest Middle School. Advisor Mary Ruth Dixon said that in the future the group plans to "incorporate the use of black light and white gloves along with stories that are both signed and mimed" into its repertoire.

LIGHTING up the *campus*

Offering a variety of activities and meetings, On-Campus Ministry organizations worked hard to meet the spiritual needs of students.

Fellowship of Christian Athletes, a Christian club not just for athletes, met to praise God through song and worship, to challenge and entertain members through skits, and to reward athletes who have worked particularly hard during a specific week. Led by James Short and nine other council members, FCA offered game nights, a special concert by Tom Conlon, coffee house nights, and fall and winter retreats.

"Lead me to the Rock that is higher than I," (Psalm 91:2) was the new focus of The Rock. Seeking to reach out to all students, a council of six students, led by Phil Kramer, president, changed the organization's name from Baptist Student Union to emphasize that this ministry is not just for Baptists, but for all who are seeking to grow closer in their walks with Christ.

In their attempt to "break down the barriers that exist on our campus," the national BSU emphasis for the year, students met weekly to hear guest speakers and to praise and worship God. Members of The Rock spent about ten minutes each week in small groups praying for individual needs and prayer requests. The Rock also sponsored a music night, a variety show, testimony night,

game night, and a prayer night.

Celebration, a weekly student-led worship service, provided "a place where people can come and worship in any way they enjoy," said Dana Grant, one of the many members of the Celebration council. "I like working with all of the different groups. It's a way to get to know people better who are involved in other Christian ministries on campus."

Through skits, Scripture, and songs led by a large praise team, students worshiped God and listened to Biblical sermons by Campus Minister Tracey Jessup.

Once a month, each of the on-campus ministry groups united through Christian Ministries United, whose theme for the year was "The Light of the World." Services included a time of praise and worship and messages from guest speakers. One meeting featured Bart Compolo, guest speaker of the Staley Lectures Series. Others guest speakers have also been a part of the services. Said Melissa Welsch, head coordinator, "One of the things we're learning the most in CMU is that when we focus our eyes on Christ, then He Himself brings about unity."

The challenge offered through CMU to light the world was echoed in every ministry organization on campus with a variety of opportunities to put actions into words.

by Jordana Hart

REACHING the masses

Every other week, a group of about fifteen students took a trip to the local homeless shelter, the foster home, or a nursing home in Shelby all in the name of ministry.

At the homeless shelter, students spent about two hours helping children with their homework and visiting with the adults.

Although the Foster Home Project had been a productive one for several years, this year brought even more success. Steve Lambert said, "I basically want to urge them to stay in school, and I let them know that I'll be a big brother to them in difficult situations."

Fellowship of Christians

United in Service, better known as FOCUS, offered twelve teams of six to eight people to minister to youth groups and churches in neighboring states and as far away as Ohio. The teams provide various services to the churches such as

leading Bible services and providing activities for children and teens.

Stephanie Anderson, who served as coordinator of the organization, said that FOCUS continues to improve yearly as it seeks to serve Christ and

minister to others through Him.

The Off-Campus Ministries organization gathered many volunteers from the willing students transformed simple volunteer work into an exciting and enjoyable extra-curricular activity.

by Jordana Hart and Jonathon Allen

"It's really fun teaching little kids things they don't know, but I like talking to the older kids about certain subjects that they usually wouldn't talk about with their friends."

ADDING to the *campus family*

Giving tours, putting together and pulling off Orientation Week, making and delivering cookies to rest homes, and the list goes on.

This year student relations was brought to a new level because of the various activities and the participation of everyone involved. The three organizations that contributed to building student relations were Presidential Associates, the Big Brothers and Big Sisters, and the Student Alumni Council.

Presidential Associates desired to make students feel welcome by giving VIP tours, serving the guests at football games, giving and family, and participating in many other activities.

Big Brothers and Big Sisters began their interaction with students from their first day on campus by moving in freshmen and transfers. For Big Brothers and Big Sisters, Janet Jones said, "The main reason I have been

a Big Sister for the past three years is that I want to make newcomers feel welcomed and excited to be here. I feel that is crucial for them to realize that they are just as much a part of GWU's family as those who have been here several years."

Once a student was at GWU, Student Alumni Council kicked in to build a bridge between current students and alumni. They were able to accomplish their goal by organizing several activities for students or Alumni. Some of these activities included the phone-a-thon for the university campaign and a gas-give-away for commuter students.

The three organizations were a vital part of campus life as they guided students to choose Gardner-Webb, then welcomed them to campus, and finally, kept ties with them after graduation.

BUILDING livable communities

When it came time to go to school, life changed, as did living arrangements. because a residence hall is more than a place to sleep. It's a living, thriving environment."

Students living in residence halls found that there was more to living with a roommate than keeping one's side of the room clean. Study habits, music, even lifestyles varied.

However when conflicts did occur, Resident Advisors and Graduate Resident Directors were there to intercede and to find a

compromise. Under the direction of Doug Searcy, the new Residence Life director, RAs were encouraged to build community in the halls. Searcy also made a point of changing the name. Instead of "dormitories," he explained, "We call our facilities 'residence halls'

Residence Hall Association and the hall representatives were there to help RAs build community. The group sponsored several events, including pizza on the quad, a Homecoming decorating con-

test, and a Halloween Masquerade Ball which allowed students to meet other students and be creative.

RHA also provided opportunities for residents to get involved in the greater community, such as the clean-up day at the Broad River.

By working together, the two groups provided a fun and safe environment which students could call home.

MAKING a difference

Making a difference. Indeed the SGA Senate made a difference this year. Carrying the responsibility of student needs, the group proposed policies and brought attention to the administration of important issues. The Senate worked for the student body.

"We are helping the student body by finding out what they want," said SGA vice-president, Allison Bowman. The Senate "is the way to change things on campus," Bowman added. The student

can enlist the administration and even Dr. White to make changes, thereby creating an organized, authorized, and acknowledged way of making changes on campus.

With all this ability, the Senate accomplished and proposed many ideas and changes throughout the year. As a whole group, which is how they work, the Senate proposed to keep the current visitation policy in effect. "Not everyone knows the visitation policy

isn't in effect forever," said Senior Senator Joe Ramirez. So in response to the policy's success, the Senate proposed to keep it in effect permanently.

Other proposals were for better lighting in necessary areas on campus.

And always an important issue, the Senate has worked on the parking problem. Another proposal was the addition of a Student Wellness Center. Finally, the Senate has worked on revising the student constitution by

ironing out the details.

Not only did the Senate propose ideas, but also completed community service projects. They sponsored a blood drive that was wildly successful.

Throughout the year, the Senate made a difference in the lives of students and the community. They made things better and safer. In the end, all their hard work paid off as the year was a great success.

KEEPING students *busy*

Pie throwing, Homecoming floats, donuts, soups kitchens, and duck feeders. What did all of these items have in common? All served as projects of Student Government Association.

Even though they were in their first year, the Freshmen class got organized quickly and won a second place award for their Homecoming float. Community service projects included cleaning up on the roadside and tutoring at schools.

Also a participant in the Homecoming parade, the Sophomore class focused on community service by "sponsoring a soup kitchen at a rest home," said vice-president Kenny

Ford. "Trick-or-Treat. Give me something good to eat!" echoed across campus on Halloween and the

Junior class added its own entertainment. President Matt Weathers said that the Halloween Safe Night was basically a small fair for the little ones." In addition, the sale of donuts proved to be a profitable fundraiser.

Creating a "Class of 1998 Scholarship Fund" was one of the objectives of the Senior class. Christmas stockings filled with candy and pies thrown at professors also raised money for the class. Finally, the class officers helped provide decorations for the Spring Formal.

Clearly, SGA class officers provided enough activities for the student body to keep them busy.

GETTING INVOLVED in the *Balancing Act*

*Students make sacrifices to
make a difference on campus.*

Athletes and musicians had to do it. So did actors and artists: Balance classwork and assignments with out-of-school assignments. Students serving as class or club officers performed the same juggling act.

Scheduling meetings, assigning duties, managing projects, and meeting with campus officials consumed precious hours from an already too short day. Despite the demands on time and energy, many seniors held several offices during their college career.

Robert Blair served as senator his sophomore year, president of BSU his junior year, and CMU Student-at-large his senior year. In his CMU position, Blair helped to keep various campus religious groups unified. Starting work before classes began, Blair constantly had to maintain a balance "between what I wanted to do when I graduate and making a difference on campus." But he quickly added that the work was necessary and worth his

investment.

Amanda Williams, who served in various student government positions for three years found the best way to stay organized was to focus on one thing. "I focused my time on student government because I enjoyed it and it was important to me. I didn't get involved with any other clubs except for FOCUS, so I could focus on SGA." Williams found that serving as the secretary of the student body took the most time, but her role as vice-president of the student body was more demanding, both physically and mentally. "I had to be prepared for Senate meetings whether anyone else was or not." Amanda said the only way she stayed organized was by keeping a planner all four years.

Despite the time constraints, students like Robert and Amanda knew that getting involved was the best way to make a difference.

by Amy Tarlton

As president of the Student Government Association, Brian Burgess assists with the campus blood drive. Under Brian's direction the Senate monitored the new visitation trial period, reassessed the policy itself, and presented its findings to the Board of Trustees.
(Photo by Karen Brower)

Stopping only briefly to answer a question, Allison Smith rushes to complete her portion of the senior float design. As a senator, Allison represented her class in the senate meeting held twice each month. *(Photo by Amy Tarlton)*

LOOKING OUT for the *curveballs*

Senior teammates look out each other on and off the field

Gardner-Webb softball seniors had a lot to deal with. Not only did they have to claim their SAC championship, but they girls also had to deal with a new coach. There were four seniors: Heather Price, Emily Harrelson, Emily Pecoul, and Kim Morris.

Not only were they teammates, but they were also best friends. Going through hours of practice and four years of games, the girls knew each other very well.

All the girls agreed that having a

“Always be ready because you never know when the next curve is coming.”
Harrelson, Pecoul, Price, and Morris

new coach was “different and it took a lot to get used to because we had Coach McGinnis for three years and now we have Coach Raysin.”

However, the experienced players readily adjusted and continued to guide the team towards their goal of the SAC championship.

The seniors wanted to leave a word of advise to upcoming softball players and their teammates. “Always be ready because you never know when the next curve is coming.”

LEADING the next generation

39 seniors awarded for their contributions to community and school.

Who's Who? Who's Who among students in American Universities and Colleges, that's who. It was a yearly honors program that recognized the nation's top college students. The students were leaders on campus who excelled in improving the positive image of the next generation. Those eligible for the program were upper-classmen and graduate students.

The committee that chose the outstanding students consisted of administration, faculty, and student body representatives. There was a set number that could receive the prestigious honor, but it was a number that allowed for the entire exhibition of the student body.

The 39 students awarded the honor were as follows: Stephanie Anderson, Christina Bailey, Jodi Baughn, Robert Blair, Karen Brower, Melissa Brown,

Brian Burgess, Randy Capps, Matthew Cates, Brian Clubb, Alonzo Custer, Heather Dawson, Brooks Derrick, Santiago Espinosa, Brandy Faught, Amy Gouge, Chris Green, Emily Harrelson, Billy Henderson, Bobby Hokett, Jeff Jimmo, Janet Jones, James Julian, Amanda Keen, Phil Kramer, Timothy Lee, Mark Lynch, Kimberly McVey, Amber Nelson, Tabettha Overstreet, Brandy Perdue, Shane Petty, Renee Phillippe, Joseph Ramiz, Leah Robinson, Amy Tarlton, Timothy Veeck, Laurelyn Vry, Amanda Williams.

Amber Nelson said, "I was surprised when I received the letter and I felt honored." Leah Robinson said, "I was totally shocked because I did not think that they had the program here."

MONDAY night Brawls

Fans of Nitro devote Monday nights to feeding a fan frenzy.

Did you ever wonder where your roommate went on Monday nights or if there was anything to do on Monday nights besides FCA? One word comes to mind: Nitro.

A plethora of students campus-wide fell in love with Nitro and attend the weekly Nitro parties held at Clayton King's house. Sometimes, the parties were held on Sunday nights as well, if Pay-Per-View events such as "Halloween Havoc," "Fall Brawl," and "Starcade" aired. Fans' conversations were centered week-long around each Monday night's events as WCW (World Championship Wrestling and NWO (New World Order) rivals battled.

Some of the most popular wrestlers from WCW were Diamond Dallas Page, Rick Flair, The Giant, Sting,

and Lex Luger. NWO fans loved Hulk Hogan, Randy Savage, Curt Henning, Buff Bagwell, among others.

However, more important than who wrestles whom or which side actually won is the comraderie that Monday Night Nitro provided. Sure, some students may have been addicted to it and actually believed that Nitro was real, but most students just enjoyed a weekly time of fun and fellowship with one another. Denise Deaton, a zealous fan, said, "Watching wrestling is not like a cultic activity like some people would say. It gets our minds off the stress of school

"Watching wrestling is not like a cultic activity like some people would say."

Denise Deaton

because it's fun."

by Jordana Hart

Devoted fans Jondra Harmon and Denise Deaton rejoice at a win by their favorite group, The Four Horsemen. Harmon and Deaton became popular for their great enthusiasm.

REACH OUT AND TOUCH in the World of E-mail

Computer lab allows for easy access to those near and far

E-mail was a quick and easy way to communicate with family and friends, as well as strangers who could become friends. Sarah Middleton said, "I love e-mail because I can keep in touch with friends and family." GeeYang said, "I enjoy e-mail because I can meet and communicate with new people."

Another attractive feature of e-mail was the cost. Not only was it quicker but it was less expensive than postal mail, otherwise known as snail mail. Students saved money that would have been spent on stamps and envelopes and were able to use the money for laundry, snacks, sodas or an afternoon matinee.

Dr. Glenn Bottoms said, "I have had students walk

into the lab to check their e-mail while I was teaching. I would ask them to leave and they would reluctantly, but some were on the verge of tears." Getting upset to the point of tears over e-mail seems drastic, but it proves that it was addictive. A startling fact, according to Tenae Amadu who worked in the computer lab for one and a half years, was that the majority of e-mail addicts were freshmen. Was this because e-mail was a new way of connecting with those loved ones left behind? Was it because many freshmen students had already had vast experience on the internet? Whatever, the reason, the com-

"I enjoy e-mail because I can meet and communicate with new people."

Gee Yang

puter lab was a popular place for freshmen and other students as well.

PATIENCE IS A VIRTUE in the strategy of *Red-shirting*

Student athletes have mixed emotions when it comes to the concept of red-shirting

Red-shirted athletes were athletes who were allowed to practice with the team but not allowed to play in the games. The athlete was still eligible for four years of playing time. Red-shirting strategy offered athletes the opportunity to work more intensely on their game, making them more competitive players for the years following. For some players, being red-shirted is tough emotionally. Wanting to play while having to sit on the bench was

difficult even when realizing that four years of playing time was still ahead.

Red-shirting strategy offered athletes the opportunity to work more intensely on their games.

A former red-shirted football player, Jermaine Howze said, "I felt bad. It was like working at a job but never getting a paycheck. At times, I would not work hard because I was not getting any playing time. But at other times, not getting to play motivated me to work harder."

Red-shirting was a team strategy that shaped teams to be the best they could be.

LEARNING from Experience

CCXP classes offered students help academic lessons, as well as life-long friendships.

The college experience was a drastic change from high school. The classes were harder, professors were stricter, and homework much more strenuous. There were new people to meet, new buildings to explore, and a whole new atmosphere in which to learn.

In the midst of unfamiliar classes, CCXP, the Contemporary Class Experience, was like a breath of fresh air. The professors were less stern, the faces strange, but friendly, and the atmosphere, more relaxed.

The class instructed the student on how to manage time and how to handle the pressure of college life.

It taught the student to become not only a better student but a better person by getting the students involved with community projects. Dr. Bonnie Wright's class sponsored a mother and a daughter for Christmas through the United Family Services.

Julie Hensley, one of Wright's students, said working on the project helped the group get to know each other better.

CCXP also gave students a chance to meet new people. Because the students in CCXP are usually the first students one met, long lasting relationships quickly developed.

Ozzie McFarland, an experienced CCXP professor, took advantage of those long-lasting relationships and had a reunion for his former CCXP classes, to which he invited this year's group of freshmen.

He wanted to give the "experienced" students a chance to share their lessons with the novice students. Sara Ristenbatt, a former CCXP student of

McFarland's said, "We gave them a little insight about the college and what to expect in the coming years. It was fun."

"We all have hard times, but that's why we have each other."

TALKING about *faith*

Talk show hosts come to campus to bring Christian message

"My momma's a prostitute and my daddy don't love her no more!" During Celebration Week, students performed skits mimicking well-known talk shows. The family counseling from "Jenny Jones" and the imitation of campus celebrities on "Geraldo Rivera" were especially popular.

What do these obviously non-Christian theme shows have in common with a week designed to bring the campus closer to God? Students say that the skits performed before praise songs and inspirational messages served to remind them that God has a sense of humor and that laughter and enjoying others is an important part of praising Him.

Jennifer Hoosier was Celebration coordinator. She came up with the idea of doing the talk

shows, but the people involved in the shows wrote their own dialogues. They tried to incorporate a variety of musicians which ranged from saxophonists to acapella artists.

Each night a guest speaker delivered the message. Brian Burgess and James Short were two of the speakers.

Hoosier said, "The turnout was great. Everyone felt that it was refreshing and renewing, more than it was an emotional roller coaster."

Students may not see Jesus on the Jerry Springer Show, but this week proved that He can use anything, even talk shows, to fulfill his purposes.

WOMEN

on the

go for God

Women With a Mission take action for God and take the Word to the streets.

Going out into the world and witnessing to people can be scary. Witnessing can make the world seem larger and more dangerous than what it really was.

But do you think that is going to stop a group of determined young women? No, because before you know it, look out, WWAM!

Women With A Mission was a group of female college students who ministered to others.

On the first and third Sunday of every month, an average of eight women gathered in the bottom of the library to plan their missions. During the meetings, they had prayer, fellowship, and discussions about missions. Occasionally they had guest speakers.

However, their involvement with missions, did not stop at talking. They visited nursing homes and planned

activities for shut-ins; they also helped at the community homeless shelter. At Christmas they sponsored the Angel Gift Tree at which they presented children with gifts.

Four days of Spring Break, WWAM travelled to Baltimore, Md. to work with inner-city missions. During the trip, they focused on street ministry and reaching people from different walks of life.

Their mission: To leave a good impression wherever they go with a big WWAM!

The ladies may never know what kind of impact they made on outsiders, but the members were affected. Brooke Buchanan said, "WWAM has made me

think more about missions and witnessing."

by Cindy Lee and Mandy Ellison

RESTING UP for the *work week*

Students spent weekends catching up or crashing before the work week started over again.

What was there to do on the weekends in Boiling Springs, a.k.a. Mayberry, North Carolina?

While some might have answered, "Nothing," others found various activities to do. Hanging out with friends prevailed as the most popular activity.

Weekends were the perfect time to gather with friends because students were not stressed about assignments due the following day.

Classes, meetings, and other activities made life hectic during the week, leaving students with too much to do and little time to do it. Weekends provided an

STUDY GROUPS

help to form

lasting friendships

Wednesday evening group builds strong bonds during Bible study

There were many Bible study and religious clubs on campus this year but only one was just for women. At first, this group was called "Ladies in Waiting." The participated in a seven week Bible study that consisted of eight women and was headed by junior Abbey Medcalf. The women met once a week on Wednesday nights. After completing the seven weeks, the group changed its name to "Becoming Women of Prayer" and lengthened the study to an eleven week

Bible study groups offered opportunities for students to form strong bonds of friendship.

period, maintaining the Wednesday evening meeting time. The group read various books and each group member selected a chapter to present. Bible study groups offered opportunities for students to form strong bonds of friendship.

VISITIN' and veggin'

Students put every effort into enjoying the much needed Christmas vacation.

The Honors group sacrificed time to help Santa Clause deliver goodies at the Reliance Electric party. (Photo courtesy of Dr. Tom Jone)

Christmas break started on December 13 after finals. Everyone gave a sigh of relief as their finals were completed.

Students looked forward to rest and relaxation. Some traveled, some worked, and some became couch potatoes.

Larry Durham said, "I worked with my dad at Larry Durham State Farm Insurance because he was short two workers, and I wanted to make some money."

Reliance Electric sponsored a Christmas party for their employees and their children. Some of the Honors students volunteered their services as Santa's helpers.

They handed out stockings filled with toys and gave the children balloons. Children had the opportunity

to get their picture taken with Santa Clause. Sarah Schassberger, Summer Jeffcoat, Andrea Turlington,

Amy Willis, and Jonathon Allen were involved in the event.

Other students took the opportunity to travel. Chad Thompson and friends went to Crested Butte, Colorado to ski and relax. Despite the thirty-hour drive, Chad said, "I really enjoyed the trip because it was out west, the snow was beautiful, and skiing was free."

Still others "visited and vegged." Amy Smith said, "I spent my break at home visiting with family and friends."

However students chose to spend their break, all welcomed the time to rest and regroup.

THIRTEEN-HOUR DAYS

lead to

fierce competition

Cheerleaders' hard work gives way to national attention.

"Any guy can hold a girl's hand, but only the elite can hold her feet." This is one of the many sayings of the cheerleading squad.

Since the cheerleaders were mostly freshmen, the squad had to put in thirteen-hour days of tough practice from August 10 until the beginning of football season. The numerous football and basketball games which the squads performed at helped also

These sessions apparently paid off because Coach Dee Pollard felt enough confidence in the squad's talents to submit a video to the National Cheerleaders Association.

A panel of judges reviewed the video to determine the squads that qualified for the first round of competition

"I am thankful to God that we have the talent, ability, and the opportunity to participate in this elite competition."

--Coach Dee Pollard

Judgement Day came on December 8. After three hours of sitting, standing, and pacing, the squad was able to pull up the results on NCA's website.

Excitement filled the air as the cheerleaders realized they were ranked in seventh place out of a field of fifteen squads chosen to compete at Division II level.

By making the first round of competition, the squad became the first in GWU history to compete at that level. All those grueling practice sessions then seemed worthwhile.

by Robert Canipe

Demonstrating that they are elite enough to hold the girls' feet, the male contingent of the cheerleading squad balances the female members in an exhibition during homecoming festivities. Workouts in the weight room made lifts a regular part of cheerleading routines. (Photo by Richie Ellison)

FOOD AND FUN

American style

International students are treated to a real American Christmas dinner.

"I'll be home for Christmas if only in my dreams." Most students go home for Christmas and enjoy family, friends, fellowship, and food. But not everyone can do this. Over the holidays, some international students stayed on campus due to various reasons, including lack of funds and time. However they too, experienced Christmas.

On Christmas Eve, Mrs. Carolyn McKinney and her husband hosted a dinner for the international students still on campus. Mrs. McKinney prepared a meal of turkey, roast beef, mashed potatoes, and cranberry sauce. The meal was authentic American food in order to provide the students with an American Christmas experience.

The dinner was not just about food. "We had

dinner and also fellowship," said Mrs. McKinney. Also the dinner was helpful in erasing the heartache of being away from home during the holidays. The McKinneys try to be "parents away from home" and be there for international students, especially at Christmas.

This type of dinner and socializing was not limited to Christmas. About once a month after church, international students gathered for food and social times. Consisting of covered dishes, meals are shared at various houses; the group alternates homes.

Fun, fellowship, and food have been bringing people together for a long time and dinner at Mrs. McKinney's was no exception.

by Sarah Phillips

Carolyn McKinney, an admissions counselor for international students, considers every international student her own. Cooking Christmas dinner for them was just one way she made students feel at home in the states. (Photo by staff)

TAILGATING

in the

COMMONS

Residents of the new University Commons have a blast at Homecoming.

Not only is it a new campus housing but the University Commons did something that no dorm has ever done, they had a "Homecoming Cook-out."

On October 11, 1997, Gabe Clvenger and Christina Bailey came up with the idea to have a University Commons Homecoming Cookout.

With the permission of Brian Capel, the University Commons GRD, and Doug Searcy, director of Residence Life, they used the activity funds of the apartment to buy food.

They served hotdogs, hamburgers, chips and drinks for

anybody who lived there. The cookout lasted for about two to three hours and out of 150 residents about 80 to 90 people showed.

"It made me feel special, like the RA's really care."

Abbey Medcalf

They had all sorts of entertainment like music and volleyball. Melissa Brown, a resident at the Commons, enjoyed the cookout because as she said, "It was free and they gave me a bag of pretzels when I left." Abbey Medcalf said it made her feel special like the RA's really cared about them.

All in all, it was a day full of fellowship and fun.
by Julie Ortiz

Playing cards in the common area of the apartments like Meredith Cornette, Laura Dern, and Adrienne Peel did, was another favorite pasttime when the weather didn't permit cookouts. (Photo by Amanda Williams)

"AUTO"-GRAPHS

with

Attitude

When one wants to express oneself, there is no better forum than one's vehicle.

Cars with their owners' personality. Sound crazy? Many personalized license plates on campus revealed various personality traits or personal favorites.

The license plates ranged from initials to phrases. Even the initialed plates had attitude. Dr. Paula Stathakis used her initials on her tag--Dr. P.M.S.

Whether this reflected her personality in and out of classroom was a matter of opinion. "My brother seems to think so. As far as in the classroom, I guess it does, sometimes," said Stathakis.

When Stathakis had car problems two days in a row, she wondered if the tag wasn't a measure of the car's personality.

Stickers on vehicles also displayed character. Melissa Brown said, "Each of my stickers has special meaning. It was either a memento of something I had done or it was a gift."

Automobiles revealed more about some than meeting them in person.

A dean's work is never done. Although Bruce Moore spent many after-hours at student events, he also had a job which included patrolling during homecoming. Moore, however, was known to get wrapped up in his work. (PHOTO COURTESY OF ANNE HALL)

NO LIMITS to the *administration*

Vice-President and President refuse to limit their job to one behind a desk.

Much of an administrator's duties take place outside of his or her office. That fact clearly applied to the role of Bruce Moore as Vice-President and Dean of Students. On any given day, Dean Moore, who preferred to be called "Bruce," could be seen in his office. Of course he was always there when a student needed him.

However, he appeared just as often in the cafeteria, chatting with nearby students. Moore also attended athletic events, cheering each dig or spike during a volleyball game, applauding a wrestler's take-down, and encouraging every athlete to keep going. Moore said, "I think it's very important for faculty and staff to support our students in and out of the classroom."

During Family Weekend, as any other time, Moore, as well as Dr. Chris White, were available to

consult with anxious parents. Dr. White conducted the parents meeting and chatted with parents during the picnic, sharing many of his experiences as the father of two former college students.

"I thoroughly enjoy seeing our students being themselves in a wide variety of settings."

Bruce Moore

Dr. White also remained an advocate for students' needs. During much of the year, he spent time campaigning for more funds to build a new Fine Arts facility.

In addition, Dr. White was among the many fans at the athletic events. During one football game, he suddenly appeared above the heads of the crowd as part of the student mosh pit.

The extent to which Dr. White and Bruce Moore went to be student advocates demonstrated that being an administrator was more than just a desk job.

by Amy Tarlton

Discussing with parents on how to be the parent of a college student, Dr. Chris White shares some lessons which he learned from experience. Many parents were relieved to know the president and Mrs. White had experienced the same "empty-nest syndrome." (Photo by Richie Ellison)

BLEEDING A LITTLE for the IRS and *Humanity*

Faculty and staff members sacrificed time and blood to help American Red Cross.

One of the events that brought faculty, staff, and students together was the Red Cross Blood Drive. Sponsored by Student Development, the drive took place in late October and mid-April.

The October date was the week of Halloween so the nurses had to endure jokes about "moonlighting as vampires" and mock concerns about taking extra "supplies for the vampire black market."

Dr. Jones, a regular donor appreciated the irony of the dates: "I thought it was neat how we gave blood on Halloween and April 15th. Bleed a little for humanity and bleed a little for the IRS."

But the real purpose was, of course, no joking matter. The campus appeared to recognize the serious

Jokes from Dr. Jones help to relieve the tension of nervous donors. With bright orange medication swabbed across their arms, those participating in the Blood Drive, matched the Jack-o-Lanterns, candy corn, and autumn leaves decorating nearby tables.

(Photo courtesy of Amanda Williams)

Managing to tolerate a photographer recording her "pain," Lou Ann Gilliam's coping strategy involves staring straight ahead as the needle is inserted. The discomfort was short-lived, though, as the needles were followed by bandages and treats.

(Photo by Amanda Williams)

nature of the enterprise, for an average of twenty people at a time were in Ritch Banquet Hall. Some filled out the requisite paperwork, others were prepped by the Red

Cross personnel, others watched as their blood filled the packets, and those who had already "bled a little" gained sustenance from crackers, cookies and juices.

For the donors like Dr. Jones, giving blood fulfilled a responsibility: "I look forward to those days. Sometime each and every one of us is going to need someone to give blood. It's like my voting obligation."

Whether the donation occurred in October or April, the Blood Drive became another time for giving.

FAMILY matters *on campus*

Faculty and staff spouses create a real family atmosphere.

For over twenty employees the term "Family Weekend" should be "Family Year" or "Family Life" because their spouses also work on campus. In several cases, the couples were both faculty members or both part of the administration, but three of the couples were "mixed;" one was a member of the faculty, and the other worked in administrative staff.

This arrangement had its advantages. Driving to work together meant fewer automobile and fuel expenses and planning vacations proved to be less difficult with the same work schedule. According to Mrs. Nell Griggs there were other pluses: "About eight years ago, our [Mrs. Griggs' husband is Dr. Keith Griggs] daughter, along with her husband and son, had a serious automobile

accident. Her husband was in surgery for over six hours, and people from both of our departments came to keep us company in the hospital. That meant a lot to us."

On the other hand, having a family member around day in and day out caused a few problems. Often, one spouse became messenger for the other, or callers dialed the wrong phone number. Couples, even happily married ones, need time apart, and working together provided fewer opportunities for that important time away.

Working on the same campus was sometimes frustrating for the spouses, but it certainly added to the family atmosphere.

MASTERING

the

American Slang

Teaching assistants from France and Columbia battle the "Southern twang and American slang" in order to improve their English.

They came with ideas and aspirations. They came to learn and to share what they have learned. They are Foreign Language Teaching Assistants. Monica Stella Cardenas Claros hails from Columbia, South America; Patricia Harter travelled across the Atlantic from France.

Monica taught Spanish and Patricia, French. Their responsibilities included teaching foreign language labs and giving help to students with questions and problems.

But they came for their own reasons as well, for improving their English skills was a key objective for both. Other reasons included learning American culture and gaining practical experience; Patricia plans to teach English when she returns to France, so she came to "improve [her] English

and to get teaching experience [and] besides [she] loves the country."

Coming to America provided learning experiences. Initially there were language difficulties. Monica felt lost: "I was not able to say what I meant and I couldn't understand; it was frustrating." But they soon mastered Southern twang and American slang.

And there were culture differences as well. Patricia noticed that "Americans were more casual about everything." She also noted how much Gardner-Webb is like a family: in

France "students come in, take the classes and leave." Despite the differences Monica and Patricia ultimately adjusted and came to feel a part of things.

IT TAKES A MERRITT

to foster

a child

Mrs. Barbara Merritt gives love and time to children in the community, as well as the students in the education department.

Helping others is an important part of Barbara Merritt's life. As secretary of the education department, Mrs Merritt assists students and faculty with class assignments and Praxis Exam schedules. On her desk, along with correspondence folders and student records, sits other evidence of her mission: pictures of her foster children.

Over the past ten years Mrs. Merritt and her husband have fostered seven young people. The Merritts have also raised three biological children and have adopted one child.

The couple takes in hard-to-place teenagers that suffer from emotional and behavioral problems. They only have one foster child at a time in order to give complete attention to each

child. These kids have no family or have come from homes that have dissolved due to substance abuse or criminal activity. Their goal is to guide these teenagers to independent living by the age of eighteen.

Several of the foster kids consider Mr. and Mrs. Merritt to be their parents and they stay in touch. Mrs. Merritt has an 1-800 telephone number so that the grown foster children can reach them no matter where they are.

Mrs. Merritt urges others to get involved in the lives of children; "It is the collective responsibility of the whole community to raise children. I have strong feelings that it is every Christian's responsibility to provide homes for children."

by Jaime Taylor

SERVING FOOD and *hospitality*

Cafeteria employees offered food and friendship to hungry students

They're not just "lunchroom ladies." For many students, they became comforting friends, offering hugs, kind words and smiles. Because students visited the kitchen three times a day, they developed relationships with many of the cafeteria employees.

Dale Ledbetter, one of the most well-known employees, recognized when a student needed a hug or word of encouragement. No matter what the weather was like outside, Ms. Ledbetter welcomed students into the lunchroom, often wrapped in her blanket during the cold winter months.

After working at the cafeteria for three-and-a-half years, she said her favorite thing about working at the cafe

is seeing the students.

Glo Tessneer another favorite employee, agreed. She could often be seen talking to students in the Snack

Bar at night when business was slow. Some students made special trips to the snack bar just to get some encouraging words from Ms. Tessneer. Danny Taylor, a junior who visits Tessneer regularly, said, "Glo is the type of person who looks out for students and cares about the needs of students."

Taking the motto "People who care" seriously, these ladies made eating in the cafeteria or snack bar a more enjoyable experience.

by Amy Tarlton

"I love seeing the students. They keep me young."

Dale Ledbetter

Taking money at the Parent's Weekend picnic, Glo Tessneer and Dale Ledbetter also acted as the welcoming committee to nervous parents. Those students who got to know the "lunchroom ladies" found them to be welcomed friends. (Photo by Richie Ellison)

Book vouchers are just one more hassle that Christina Bailey has to deal with during the first week of classes. Finding money for books seemed to be as much of a problem for students as finding the time to read them. (PHOTO BY GARRY ELLER)

Expanding departments meant hiring new faculty members such as Dr. Charles Tichenor. Dr. Tichenor, who received degrees from Duke and Harvard, served as the Dean of Business as well as teaching classes in the Broyhill school.

(PHOTO BY AMANDA WILLIAMS)

Justin Alston and his parents share a laugh with Tracy Jessup, the campus minister during Parents' Weekend in October. Many parents felt more at ease with their child's transition to college after speaking to faculty members. (PHOTO BY RICHIE ELLISON)

Sharing stories of his childhood, author Ron Rash, a native of Shelby, speaks to a group of students and community members in a reading sponsored by the Year of the Scholar council. Most 100 and 101 English classes read Rash's book *The Night the New Jesus Fell to Earth*.

After five-page essays, ten-page research papers, an hour-and-a-half long tests and three-hour exams, students questioned whether college was worth the hassle. With no schedule written in stone, anything was

subject to change

and things did. All four assistants to the registrar worked overtime during the drop-add period signing papers and printing new schedules for nervous students. Changes in classes also meant changes in books which kept book store employees always on their toes. In other areas, nineteen professors were added in eleven departments ranging from biology to marketing. However, some things did not change regardless of student opinion.

Although students dreaded the thoughts of getting up for 9:25 Dimensions, six semesters of the one-hour class were required by all to graduate.

Working for the grade

It's not all about making the grade. Although members of Alpha Chi and the Student Honors organization were admitted to the separate groups because of grades, they did not limit their goals to better grades.

Alpha Chi members were dedicated to making their good character even better. Among rigid academic regulations for the juniors and seniors, members were also required to have good character and no disciplinary probations. The emphasis on character was just one extension of self-improvement.

The Honors Organization which included first-year students included activities that provided community improvement, as well as cultural development.

In the fall, the group went to Chimney Rock and worked on an all-season trail for hikers. Closer to home, the groups made cookies and delivered them to nearby rest homes.

To develop their cultural knowledge, the Honors organization attended the Renaissance festival and a performance of Handel's *Messiah* in Charlotte.

"This year I really feel Student Honor's Association is really beginning to form a dent," said Dr. Jones. "I think that the established CCXP honors class has brought new life to the class. I hope that in the future the association will continue to build on the foundations that have been established this year."

by Candice Yoder

Walsh, R. Walters, G. Williams, A. Willis, S. Willis, Dr. Bob Morgan, Dr. Sue Camp, and Dr. Ruth Pace, Faculty Advisors.

Expanding for the future

We are very excited about moving into Hamrick Hall," stated Jim Hartman. And for good reason. The Hall will provide the business school additional classrooms and offices as well as a computer lab and a multi-media classroom. The only problem was the weather. Severe rainstorms hit campus delaying the renovation of the century-old building. So, business faculty spent much of the year wishing that the rain would stop and the renovation would begin--again.

New faculty members added variety and expertise to the school. Amy Cox brought credentials in Marketing, and Michael Schumacher added his qualifications in Business and Accounting. Dr. Charles Tichenor also joined the faculty as Distinguished Executive in Residence and professor of business.

As the year passed and the weather cleared, faculty members, old and new, wondered how far the deadline for the completion of the Hamrick project had been delayed. Of course, only time, and the summer weather would tell.

Putting the words on the street

Spring '98 kicked off the second year of the *Green Room*, Gardner-Webb's very own television broadcast.

The five segments included news, student life, campus ministries, sports, and entertainment. The program was for the students and by the students. Students enrolled in the television studio operations course used portable equipment to obtain active footage. The students met once a week in Bost 129 to tape the show.

Green Room began as a project in a television broadcast class. Communications major Herman Wilson chose the name *Green Room* to reflect the laid back mood of the program. Anchors dressed casually, instead of suits and ties or dresses.

The goal for the Spring 98 season was to film at least ten editions of the program. Executive producer/advisor Vic Costello said, "Right now *Green Room* is limited to communication students only because of the wide amount of background knowledge required. However in the future they hope to include any students who wish to participate."

Along with expansion of the student news show, communication students were also treated to a new computer lab. The high-tech computer lab has twenty-two workstations created for graphic and multi-media intensive applications complete with layout and design, audio and video production, and web page development. The lab has an instructor's workstation which includes a large screen video display, a negative scanner, and a flat bed scanner.

"This lab is the only MacIntosh®-platform computer lab on campus and is not just for checking e-mail," said new professor Bob Carey.

All the new technology is designed for students' benefits. As Matt Norman said of *Green Room*, "[It] provided me with the practical skills required in the field I plan to enter. It was rewarding to see our work come together into a polished finished product."

Practicing work From 9 to 5

From the nursing department to the communications department, internships provided hands-on experience. Although not always called internships, most departments had some type of field experience; nursing called clinicals while the education department called it student teaching. Whatever it was called, the internships were a way to continue learning under supervision, without making crucial errors.

Nursing majors went to various hospitals around the area. Although closely supervised, the second-year students could give shots, start IVs and "do about anything that real nurses can do," said nursing major Samantha Ball. She added that clinicals also help nursing majors get used to getting up at 5:00 a.m.

Biology major Renee Phillippe was given a chance to work with slightly less supervision. Phillippe spent her summer at Glaxo-Wellcome Laboratories in the Research Triangle Park conducting research on a drug to treat epilepsy. Although supervised, Phillippe did her own research. She said, "I'm glad I did it. I feel like it was a much more valuable experience than in the classroom because it was up to me to teach myself things I didn't know."

Although some students decided they would not go into the field in which they interned, they still learned from their experiences. Stephanie Anderson worked at the Cleveland Center in two areas to fulfill a requirement for her psychology minor. Anderson said, "I loved the experience of working with many different kinds of people." Anderson chose to do the internship for psychology to give her a base experience of working with different kinds of people and different ages to prepare her for the ministry.

Several communication majors also got a taste of the real world. Frank Spurlock worked at WSPA, a TV station in Spartanburg, S. C. While there he worked with the Flying Ace Productions, an ad agency in the station; he also worked in the art department. Spurlock, who plans a career in graphic design, agreed with others who interned that the field experiences were more beneficial than classroom learning.

Performance under pressure

Classes. Observations. Lesson plans. Tutoring. A student education department had to juggle these things and more in order to stay ahead. Education was a time-consuming major. Students were required to be in the public school system to conduct class observations, attend school board meetings, tutor children, and obtain classroom experience.

Tiffany Keating said, "Classes, observations, and projects take up a lot of my time, but the experience that I gain will be very beneficial to my career after I graduate."

Education students could often be seen carrying projects to their classes. Projects pertaining to their field of study were a major part of education classes. Students got practice writing lesson plans, compiling units of study, and peer-teaching.

Melissa Armstrong said, "Being an education major takes great discipline in order to juggle your time. It takes hard work and a creative mind to complete all of the projects that are required."

Education students were also under the added pressure of passing certification exams. Students must pass a Praxis Series I exam consisting of three tests in order to gain entrance into the teacher education program. To exit the program, students had to pass the Praxis Series II, Principles of Learning and Teaching exams based on the student's desired grade level. The students also had to pass content area tests depending on the student's area of concentration.

It often took education majors four-and-a-half years to complete this program due to the class load and student teaching. Students had a semester of five weeks of classes and ten weeks of student teaching that completed the requirements for graduation.

Although the criteria for education students seemed rigorous, it was intended to prepare the future teachers for performance under pressure.

Adding chapters to the book

Experiencing transitions of all kinds, the English department not only added new professors, but also extended its expertise beyond the classroom and into the community, thereby adding another chapter to its book of accomplishments.

Dr. Matt Theado expanded his horizons and wrote a book entitled *Understanding Jack Kerouac*. The book, which will be part of a series, provided an overview of Kerouac and what he did as a counter-culture leader. It was designed for undergraduate students and interested, non-academic readers.

Dr. June Hobbs expressed her understanding of hymnody and the woman's part in it. The title of her book was *I Sing for I Cannot be Silent: The Feminization of Hymnody, 1870-1920*. It discussed the lack of expression women had in public worship and how women searched for a way to portray their views.

Held at local libraries, "Voices and Visions" was a six-part reading and discussion series on modern American poets including Langston Hughes, Elizabeth Bishop, and T.S. Eliot. Drs. Joyce Brown and Gayle Price read the works and led the discussions. According to Dr. Price, the program has been successful for several years.

Dr. Price said, "This series is *not* about scholarship, but sharing poetry. This is *not* a class. Our goal is to provide some cultural information and to sharpen a person's ability to enjoy poetry. Poetry is a pleasure to read; each person's interpretation is different."

Sigma Tau Delta, the English honor society for majors and minors, inducted eleven new members this year. Some of their service projects included compiling a book of the best English essays and a used book sale. To keep with their scholarly theme, the group sponsored a movie night where they watched the movie version of Jane Austen's novel, *Emma*.

Along with the new inductees, three new faculty members, Dr. David Parker, Ms. Jennifer Carlile, and Ms. Susan Bunn, were added to the department. Dr. David Parker said, "I really like it here because it is a small campus. The location is an asset because I wanted to be in the Southeast."

Creating magic in the classroom

Professors in a classroom. So what else is new? The Writing Across the Curriculum fall retreat was new because the professors were *in* the class rather than in front of the class. All shared an interest in writing and all represented different departments. Together, at Wildacres which some called “magical,” participants brainstormed about how to make learning even more phenomenal.

Each fall approximately 20 professors meet for a weekend to develop new writing techniques and assignments which were incorporated into their classes. The primary focus of the session was the use of writing as a way to learn.

Coordinator Dr. Gayle Price said, “The WAC Retreat is an opportunity for interested faculty to get away for the weekend to an idyllic mountain setting with wonderful food at no personal expense! Additionally, it is an opportunity (for those who haven’t been before) to get a crash course in the why’s, what’s and how’s of the two dimensions of the national disciplines. For those who have been before, it is an opportunity for reading, contemplating, writing, and discussion with colleagues in various departments about how to use writing to become a better teacher.”

Dr. Sophia Steibel, a professor in the religion department, echoed Dr. Price’s comments. “The WAC retreat is one of the best opportunities at GWU to renew and replenish for effective teaching. I have attended three of such retreats and each has contributed to my understanding of how to utilize writing as a creative tool for teaching and learning.”

Results of the WAC retreat included an astronomy observation log and a religion essay critiqued by an interdisciplinary panel. In addition, discussions during the retreat led to interdisciplinary courses such as a composition and math class and a biology and literature class.

Perhaps the most influential product of the retreat was the Year of the Scholar, which began in 1996 and generated an increase in scholarly activities across campus.

Playing harmony in the band

Yes, Gardner-Webb, there is a band; in fact, there are three distinct musical groups in the Fine Arts Department: the orchestra, the pep band, and the symphonic band. Throughout the year, students enjoyed the groups' music. The pepband performed at football and basketball games, while the orchestra and symphonic bands both held winter and spring concerts. And, for students, all admission was free.

"A fully instrumented, symphony orchestra," under the direction of Dr. Plate, performed two shows a year, one in the fall and the other in the spring. The fall concert, "always a little bit Christmas and an little bit classical," included two feature players: Mr Gene Ellis, the trumpet teacher, and Dr. Stephen Walter, the new guitar teacher. Mr. Ellis fulfilled a life-long dream and played Hummel's "Trumpet Concerto in E Flat," while Dr. Walter performed a movement of the "Rodrigo Guitar Concerto" (which was acoustic guitar, something the University is promoting). In the spring, the orchestra hosted its Regional Concerto Competition where they appeared as soloists in a final concert.

Like the orchestra, the symphonic band held fall and spring concerts. In the fall concert, the band performed marches, classical pieces, and a medley of tunes from *The Wizard of Oz*. "We tried to vary [the music] and have something for everybody," said Dr. Matt Whitfield. The Spring Concert audience also heard a mixture of music ranging from marches and hymns to an opera and an American Spiritual. Senior Chris Green appeared in a trumpet solo, and previous band directors were invited back as guest conductors. Bob Decker conducted "Americans We" because he knew the composer; and Oland Summers presented "Dramatico."

"Hey, play 'YMCA'!" Anyone attending a home football or basketball game knew the pep band's power. Responsible for exciting the crowd and recharging the team, the band took its job seriously. And, like all of the musical groups, the pep band encouraged student participation.

As Dr. Plate stressed, the bands were "available to the students, and we encourage them: [the groups] are for everyone."

Talents both many and varied

With a stroke of a brush or a perfect "c," artists worked hard at their craft, and whether it was in the art class or as a member of the concert choir or chorale, students found their niche in the world of visual and vocal arts.

Change and new opportunities were the order for the art department, including a new professor, new classes, and new experiences. Joining the department during second semester was Ralph Pa'quin, a nationally recognized and award winning ceramist. "The art department is ever growing with strong emphasis in both the 2-D and 3-D studios," said Susan Bell who went on a "travel seminar to study the great narrative murals of the Italian Renaissance."

On the vocal side of the arts, the concert choir and chorale performed often, giving all ample opportunities to hear their voices. Chorale performed "a variety of songs, both sacred and secular," said director Phil Perrin. Examples included "Kumba Ya," Baroque music, and even John Rutter, a twentieth-century composer. Directed by Chris Roberts, the concert choir did "tours" in both the fall and spring semesters, performing in three local churches. During Spring Break, they toured to six North Carolina churches. Roberts added that choir members were "some of the finest students" who served as ambassadors for Gardner-Webb.

Whatever students chose to do, their opportunities, along with their talents, were many and varied.

Promoting interest in languages

In an effort to promote interest in the foreign languages on campus (French, Spanish, and American Sign Language) the French and Deaf Clubs provided opportunities for student involvement.

Headed by Dr. Bob Morgan, Chair of the Foreign Language Department, the French Club was quite active on campus. The club's first activity of the year involved building a foil Eiffel Tower for its float for the Homecoming Parade. Members also played Bingo with residents of a local nursing home and distributed Halloween candy to children in Shelby's homeless shelter. Besides serving the community, the club participated in fun activities, such as singing Christmas carols in the cafe and ice skating at Eastland Mall in Charlotte. Patricia Harter, the French teaching assistant, said that the club, "gave me the opportunity to experience American culture and interact with the students."

Existing for the purpose of keeping deaf students together and mainstreaming them with hearing students, the Deaf Club met every other Thursday and assembled once a month for an activity. Tonya Clinkscales, president, worked with Holly Nelson, club sponsor, to plan these activities. The group went out to eat together, had a Halloween costume party, went snow skiing, had an annual cookout, and participated in Deaf Awareness Week in February.

However, the most important aspect of the club was working with the preschool satellite program in Shelby at Christmas, which matched deaf preschool children with deaf adults as role models. A deaf Santa Claus was adored by the kids also. Nelson, who was club president in 1989, said, "The Deaf Club is important because it gives us a chance to interact without prejudice, without burdens, just to communicate and be together. We're here to educate deaf people so they can communicate with us."

In order to establish an ASL program similar to the French and Spanish programs already in existence, the ASL department planned a weekly lunch session in the cafe, as did the French classes. ASL interns worked at NC School for the Deaf, the SC School for the Deaf, Deaf Outreach Opportunities, Blue Ridge Interpreting Associates, and the Noel Program for Deaf Students. The program also hosted the NC ASL Teachers' Convention in April.

Growing by leaps and bounds

Growing by leaps and bounds, the GOAL program has seen a steady increase in enrollment. New GOAL director Carolyn Jackson said that the growth is because of the effort of Admissions and word-of-mouth from present GOAL students.

The GOAL office continues to get inquiries and calls to add more majors to the program. "Gardner-Webb's professors are the glue that makes the GOAL program stick," said Jackson.

Students are pleased with the GOAL program. Catherine Powell said, "The GOAL program is very convenient and has helped me continue my education while being married and having a full-time job. I highly recommend this program."

Another growing program is the Graduate program. There are seven graduate programs and four sites are off-campus.

In Fall 1997, there was an increase of 51 percent from Fall 1996. In the Fall 1997, there were 265 students in the graduate programs. In Spring 1998, there were 269 students for an increase of 41 percent over the previous spring semester.

The newest program is the Middle Grades Education; the School Administration and School Counseling programs are the largest.

Most students work full-time and attend the graduate courses in the evening and most people average one or two classes each semester. Shannon Kennedy, a graduate student and an employee at Gardner-Webb, said, "In the graduate program you are able to use what you learn right away on the job, as opposed to the undergraduate program where you have to store the information for later use."

by Jaime Taylor

Classes are not limited to those meeting on the Gardner-Webb campus. Satellite schools, such as this one at Isothermal Community College, also provide a more convenient education to those in the GOAL program. *(Photo by staff)*

Assessing the strength of Jennifer Carrawan's quad muscles. Tracy Wiggins, a graduate assistant athletic trainer, discusses strengthening exercises. Wiggins sometimes worked 40 hours a week and went to class. (PHOTO BY GARRY ELLER)

Taking a break from their jobs, graduate students employed by Residence Life took a ride on the John Deere Gators at the Residence Life Christmas party. The GRDs and ADS not only took graduate classes, but they also lived in the dorms among undergraduate students. (PHOTO COURTESY OF JASON FARR)

Learning assistance

After graduation, then what? For many hoping to go further in life, graduate school was the answer. To get through grad school often meant taking on other jobs to pay for the program. While some looked for work off-campus, others looked for work nearby on-campus, serving as graduate resident directors, office assistants or assistant coaches.

Tracy Wiggins was a graduate assistant athletic trainer enrolled for six hours in the physical education program while being required to work twenty-five hours a week. Tracy went above and beyond the call of duty and worked forty hours a week and sometimes more when she traveled with the teams.

Wiggins, who did her undergraduate work at Liberty University, said, "This is a less conservative campus than Liberty which allows more space for students to grow. It offers a really good opportunity to excel because of the small size of the classes."

Mike Stimpson, the graduate resident director for Spangler Hall, also worked in the graduate office and the Learning Assistance Program.

Stimpson studied school counseling and was enrolled for six hours. He said, "The work is not at all overwhelming and I think that it is partly due to the fact that I enjoy what I do."

Mike Mustian was Assistant to the President. Along with a full-time job, he attended ten hours of school, working towards a Masters of Divinity degree. He said, "I have different things to do at my job that gives me a wide spectrum of how a college is run."

Jason Farr, the graduate resident director for Lutz-Yelton, took fourteen hours as he worked towards a Masters of Divinity degree. He also spent twenty hours a week as youth pastor at Hulls Grove Baptist Church.

He said, "You learn from success and failures. Seeing someone succeed is a benefit. What I learn in school comes out in my work with youth."

Although working and going to school was a trial, for some it was also survival for a better job in the long run.

by Mandy Ellison

Michael Mustian finds information for secretary Kendra Haneline. In his new position as Assistant to the President, Michael Mustian also remembers well the headaches of homework, especially since he still does homework.

Managing sports and reaching health

By adding faculty, courses, and a major, the Health and Physical Education Department expanded to a new level. New classes in Principles of Sports, Sports Programming, Management and Implementation made the new major, Sports Management, possible. Appealing to those interested in sports but not in teaching, Sports Management offered additional job opportunities. With this background students will now qualify for positions as Athletic Directors, Sports Information Directors, or YMCA directors or in positions in City Parks, Golf Clubs, amateur sporting events or fitness clubs.

Three new professors brought fresh perspectives to the field. Dr. Thomas Coates, Dr. Carol L. Blassingame, and Larry Brey added their expertise to the existing courses as well as those new in the Health and Physical Education. Dr. Coates taught, as part of the Outdoor Adventure course, canoeing on Lake Hollifield and the Broad River and helped develop a new Scuba Diving course. Dr. Blassingame taught Health classes, the introductory Physical Education course, and Advanced First Aid. Mr. Brey, as part of the Athletic Training Program, conducted classes in that area.

Being a diligent student sometimes means spending time asking questions outside of class. Becky Lane sought extra help from Dr. Patrick Canupp in the math department. (Photo by staff)

Adding on one by one

Memorized any logarithms lately? If so, you must be a math major. Math science was not a very wide-spread study. The courses were strenuous, but worth it in the end.

Math majors had several opportunities to put their studying into effect. Tutors in the math lab, clerical work, and paper grading were offered as work-study to math majors. The work study gave the majors promising future career choices. Outside of education, some of the bigger employers were the government and insurance companies.

Growing slowly, the math department added one new faculty member, Dr. Patrick Canupp. Newly elected chair, Dr. Bob Bass, said, "I expect the computer science to grow significantly in size, requiring another faculty member."

For now, the math department has enough faculty to keep math majors and core math students busy. Melissa Melton, a math major, said, "Being a math major is a tough task. There are so many maths to take at once, but I haven't gotten them confused, yet. If I can make it through the math program at Gardner-Webb, I can make through anything!"

by Cindy Lee

Recording results as they go, Andre Coley and Ron Johnson work their way through a lab session. Labs served as a way to cover a portion of the extensive material prevalent in natural science courses. (PHOTO BY JAMIE TAYLOR)

“Lab”-oring through the sciences

Labs, labs, and more labs. With every science class came a weekly three hour lab which often ran into lab overtime. Science majors spent a large chunk of their week “doing time” in the lab or, on the average, three to four hours preparing for a lab. Study time for class usually exceeded that.

Christina Cox said, “Chemistry 112 is the hardest class I have taken because I have to study a lot and read in order to learn. I was still unsure if I knew everything I needed to before and after tests. It took a lot of study time.”

Labs also provided work study jobs in the form of lab assistants. After the professor gave instructions, the workers helped students with the lab. “Some students feel more comfortable asking another student for help. It takes the pressure off them. I have learned a lot by helping others learn,” said John Silver.

Despite the toll on their time, students felt that labs were beneficial. Amy Smith said, “The science department’s curriculum is very demanding and I spent many late nights studying. But now that I’m graduating I feel that I will be prepared and competitive in my future career because of the high expectations of the Biology department.”

by Jamie Taylor

Adrift in a sea of notes, study guides, lab notes, and textbooks, Christina Cox and Kristen Kirschner review for an upcoming chemistry exam. Christina, Kristen, and other members of the class often studied together in order to cover as much material as possible. (PHOTO BY JAMIE TAYLOR)

Practicing medicine on campus

Waking up before dawn for clinicals, studying for tests which cover hundreds of pages of material, and stressing over long classes are normal activities for nursing students. "I can't wait for the really fun stuff to start. Like working in obstetrics with the babies," said Aubrey McBryde, a freshman nursing student.

Theirs is one of the most challenging degrees to obtain because of the extensive knowledge a nurse must possess, and this year the nursing department utilized various computer software to give students the opportunity to apply their knowledge in practical scenarios. "Some of the software offers hypothetical health care situations and possible situations for a student from which to choose. Other programs give practice tests with questions similar to the NCLEX-RN," said Dr. Shirley Toney, dean of nursing.

Establishing a computer lab especially for nurses is a departmental goal for the near future. Not only will this enable students to benefit from more extensive research, management, and health assessment software and to become computer efficient, it will also aid them in preparing for the computerized NCLEX-RN exam which must be passed to receive eligibility to practice nursing.

Nursing students are some of the busiest on campus, with responsibilities ranging from off-campus hospital work to late-night study sessions, but they are consistently given the experience, motivation, and resources necessary to fulfill their dreams. *by Summer Jeffcoat*

Stephanie Deaton fills out a survey about the Nursing Fair in the Fireside Lounge. Deaton was working on her associate degree in nursing. (PHOTO BY STAFF)

Trish Murray's efforts to get the class involved in her lecture brings smiles and laughter from her Human Development class. Murray was a counselor in the Counseling center but also taught this class in the spring.
(Photo by staff)

In touch with the human psyche

Ever wonder why people do the things they do? For those students interested in answering this question, the Psychology Department was there to provide the answers.

Psi Chi was the Psychology Honors Society. The criteria which must be met was completion of three Psychology courses with a 3.5 GPA, a cumulative GPA of 3.0 and registration as a major or minor of Psychology.

The Psychology Club was for anyone, not just Psychology majors and minors. They sponsored various activities. Guest speakers were a frequent happening at the meetings. A department book review was held in which the faculty read to the students.

The Senior Capstone Program provided information to undergraduates and graduates through the use of guest speakers. A jobs bulletin posted in Lindsay Hall displayed the various opportunities open to them.

The lab consisted of a counseling and observation room for graduates. The main room contained a collection of various journals for student use.

Dr. Bonnie Wright and Dr. David Carscaddon researched problem-solving in GOAL and day students. Dr. Carscaddon submitted his dissertation on abuse shelters for women. Dr. Wright took the research a little further. She focused on femininity in problem-solving. Inclusive in that part was the difference age had on values.

Dr. Wright said, "Dr. Carscaddon and I wanted to get the students involved in the research and we were very pleased with their response to it."

by Mandy Ellison

Dr. Jack Ranier is an associate professor of psychology who recently moved here from Georgia. Before teaching full-time, Ranier worked as a psychotherapist and a consulting psychologist. *(Photo by Amanda Williams)*

Organized religion

Ministry, outreach, knowledge, service, dedication, wisdom--many organizations on campus encouraged the importance of these things while seeking to build character and sharpen leadership skills in students' lives.

Two such organizations were directly related to the religion department. Theta Alpha Kappa, the religious honor society, overseen by Dr. Jack Partain, emphasized scholarship for religious study majors. Its members were required to have 3.0 cumulative GPA's, 3.5 averages in their religion courses, and at least 12 hours of religion credit beyond the core requirements. Meetings offered students encouragement in their academic endeavors, intellectual discussion, and a forum to present papers and other projects to each other for evaluation.

Campus Ministries Association (CMA), advised by Dr. Sophia Steibel, focused on exposing students to different service opportunities and stressed the responsibility of future leaders to be involved in professional organizations that do the same. Speakers, including Divinity School professors and local youth ministers, were invited to meetings to give information about topics that could not be covered in a classroom setting.

Indeed, Theta Alpha Kappa and CMA gave new meaning to the phrase "organized religion."

Taking classes on the road

Field trips in college? Yes, field trips provide a learning opportunity for students majoring in the social sciences. In Dr. Barry Hambright's Judicial Process course, students visit the South Carolina Supreme Court in Columbia. "It's a lot closer than trying to visit Raleigh's Supreme Court," said Dr. Hambright.

Dr. Tony Eastman and Dr. Joyce Brown take students in their Civil War and Literature course to Charleston to tour the historical sites. In Fall 1998, Dr. Negbenebor and Dr. Alexandre Strokanov took a group to Washington, D.C.

Dr. Strokanov also took a group of students to Russia. They visited Moscow, met politicians, and looked at the stock exchange. Focusing mainly on the people and the culture of Russia, the group visited families and had lunch with them. The students watched a ballet performance, attended a Russian circus, and toured art museums. Dr. Strokanov said, "The students say that the trip changes their minds toward Russia and they see things with different eyes."

Students could receive three hours of credit for the trip by listening to lectures and writing a paper, or they could go for fun and still receive one hour of credit. Students obviously feel the trip was worth the credit. Mauricio Sebastiany, one of the participants, said, "The trip to Russia was very impressive. It was one of the best trips that I have ever had. Dr. Strokanov was throwing hundreds of years of history at us from 9 a.m. to 10 p.m., yet he made it fun and interesting. It was an amazing trip. *by Jaime Taylor*

Students in the School of Divinity sing during the Founders' Day celebration at First Baptist of Boiling Springs. (PHOTO BY RHONDA BENFIELD)

Change of curriculum

Responding to God's call, students attending the School of Divinity discovered that they could serve God through many different mission fields. And, in order to address the range of opportunities open to divinity students Dr. Wayne Stacy and faculty members expanded the Masters of Divinity curriculum.

Additions to the program include a Masters of Christian Education and a Masters of Church Music. Rather than separate the fields in different schools, the School of Divinity housed all under the same roof through the newly-designed curriculum. Students will benefit from the broader, unified approach. According to Dr. Stephen Hearne, "The unified core of the Christian Curriculum will make the program stronger and enable graduate students to more effectively minister multi-staff administrative situations."

A second goal of the school is to increase enrollment, which means that Dr. Stacy spent much of his time travelling to publicize the school. In addition to the benefits of the new curriculum, the School offers the incorporation of computer and Internet technology. Students can research topics in libraries across the country or discuss global issues in chat rooms.

Ultimately, all of the changes will enable students to fulfill roles of preacher, teacher, minister, or administrator. Dr. Mary Alice Seals stated "I can't wait to see the jobs students in the Divinity School get after they graduate."

by Robert Canipe

Fall semester athletes arrived five days before the other students and began practice early. Very early. Members of the women's soccer team were in the training room by 5 a.m. to be taped for early conditioning runs. All the long hours of practice, training and conditioning were for one main purpose. Even the nightly study hall sessions boiled down to one reason,

finding the zone

in the game and in the classroom.

Athletes describe "the zone" as a place where the body and the mind come together in perfect harmony for the benefit of the team and the pure enjoyment of the game. In the classroom it was the "A-ha!" moment when a new concept just clicked. Finding the zone required a gradual development of mental and physical abilities, both of which were provided by the coaches and by new athletic director Chuck Burch.

At the same time, new coaches

Steve Patton, Debbie Raysin, and Millie Keeter-Spangler had to find their own zone on a new campus with a new team. That task required a few changes of the team and the athletes.

--by Amy Tarlton

Checking out her vital signs, Larry Brey, Program Director for Athletic Training, and Brandy Perdue, an athletic trainer, prepare Emily Harrelson for cross-country practice. Knowing that the athletic trainers were taking care of their physical needs kept athletes' minds clear for the game.

Wendy White hits a foul off the end of the bat in the first game against Belmont-Abbey in October. Although the regular season had not begun, the pre-season game provided a chance to practice with real competition.

(PHOTO BY RICHIE ELLISON)

Now that the baseball team has some experience, the baseball team looks forward to a successful season.

LOOKING for a squeeze play

Baseball is a game of chance. A clutch hit here, a strike out there, and last season would have been a much better one for GWU. And after a disappointing season in 1997, the Diamond Dogs are looking to make some noise this spring.

With several returning starters and a solid incoming class, Coach Clyde Miller has plenty of talent and experience on hand to compete in the always tough South Atlantic Conference.

Catcher Wes Gentry will lead the offensive attack. Gentry, team MVP and an all-conference selection as a freshman last season, was phenominal last spring. He hit .325 with nine home runs and 46 RBI.

Second baseman Brad Cuttino returns for his senior season as the anchor of the Runnin' Bulldog infield. In addition to his solid defensive play, Cuttino will be counted on the get on base for the heart of the lineup.

Will Moss, Wes Barkley, and Adam Sayers

will all have to take on bigger roles this season for the GWU offense to be successful.

Of course, no baseball team is any better than its pitching staff. Miller does have a few arms to work with in his current pitching stable.

Brian Rhodes, Brandon Lackey, Michael English and Daniel Planck combined for over 230 innings last spring, and as the staff veterans, they will probably be used even more in '98.

The recruiting class contains five new pitchers. Brock Collins, Marty Wheatley, Michael Harris, Joey Goble and Jeff Tyson are all highly-touted prospects, and a few of them will have to step up if this team is to improve on last season's performance.

The South Atlantic Conference is no place for rookie pitchers, but with a few breaks along the way, the future for this team could be now.

by Randy Capps

After practice, Coach Clyde Miller gives the team a pep talk. Pointing out the positive aspects of the team helped balance out the problems.

(Photo by Richie Ellison)

With a wave of Coach Miller's hand, Wes Dellinger continues on home during a practice. Because of excessive rainy

days this season, the length of practice was often left up to Mother Nature. (Photo by Richie Ellison)

Practicing for the big game includes practicing for the big home-run. (Photo by Richie Ellison)

SAC TOURNAMENT:

Wingate	W
Mars Hill	W
Carson-Newman	W
Carson-Newman	W

Coach's Corner:

"My most important goal for the season is to put a team on the field that is exciting to watch; one that will be aggressive on the bases to produce runs and win! But most importantly [for the athletes] to grow as young adults who will be a more positive influence and role model for the youth of today."

SICKIN' the competition

Underdog softball team knocks off Carson-Newman twice to become the SAC champion.

With a 3-9 record, the 1996-97 softball team bounced back from being the lowest-seeded team to win the South Atlantic Conference title. The Lady Bulldogs boast four members with All-Tournament honors for their performances--Tina Mitchum (Tourney MVP), Emily Harrelson, Heather Price, and Bekki Reuter.

"It was a great feeling beating Carson-Newman twice and seeing the astonished looks on people's faces that a team next to last had won," said Angie Blair. "Winning the SAC tournament championship was one of the most outstanding memories of my softball career at GWU," Emily Harrelson said. "Being the SAC champions was one of the best feelings that you could share with all your teammates," said Bekki Reuter.

Growth of the team was

essential for the successful finish to the season. Veteran player Emily Harrelson said that she grew by "having a higher skill level, having an increased appreciation of the game, and an improved confidence about my ability."

"We all dug down inside to show how well we could play seeing as how we were the underdogs."

--Bekki Reuter

Hopes are high for the 1997-98 season. The team has a new coach, Debbie Raysin, and everyone is reacting well to the change. The native Floridian Debbie Raysin decided to come to GWU after applying for the head softball coaching position. Her plans for the season are "to put a team on the field that is exciting to

watch, one that will be aggressive on the bases to produce runs and win. But most importantly [for the athletes] to grow as young adults who will be a more positive influence and role model for the youth of today," said Coach Raysin.

Jamie Taylor

Working on fundamentals, new Coach Debbie Raysin and catcher Mary Kirkman discuss a few points. "Coach Raysin's coaching style included break down and repetition in practice, but also motivation and positive reinforcement," said Emily Harrelson. "I am both a fundamentalist and strategically minded coach," said Debbie Raysin. (PHOTO BY RICHIE ELLISON)

In a dramatic turn of events, the women's basketball team now relies on lesser experienced players for leadership.

FULL court press

It takes a licking and keeps on ticking. That sums up the season so far for the Lady Bulldog basketball team. Despite being plagued by injuries, they have not given up.

Amy Phillips, 6'3" center, sustained a knee injury early in the season that has kept her on the bench. Katie Jordan came down with mono in January that put her in the spectator seat.

Not only were they injured post players, they were veteran players. The injuries have caused a lack of depth, height, and experience. With only ten healthy players on the roster, the starting team is composed of four freshmen and one sophomore.

Despite the overall record being 7-10 and the South Atlantic Conference record consisting of three wins and four losses the underclassmen stepped up and responded well to the challenge. Vaida Turkauskaitė saw nothing but the bottom of the net as she piled up points to become the leading scorer on the

team. Her consistency has been an important element in building the base for the season and next season.

Katie Joseph, who returned in January after she recovered from mono, is averaging fifteen points and seven rebounds a game.

Jamie Boyles, a sophomore, has stepped up as a leader both on and off the court. On the court, she made the transition from guard to post player. Off the court, Boyles' leadership keeps the team focused as they persevere through adver-

"If we continue to improve and pull together as a team, we are going to be dangerous when the post-season play starts."

--Coach Eddie McCurley

sity.

With no more injuries and strong inside playing, the Lady Bulldogs will be able to play anybody, come tournament time. If all goes as planned, they will be a force to be reckoned with during the tournament. Coach Eddie McCurley said, "If we continue to improve and pull together as a team, we are going to be dangerous when the post-season play starts."

Rogers, Man., T. Harrison, K. Joseph, A. Phillips, D. Cartwright, H. Flournoy, L. Walsh, Manager, T. Oglesby, Asst. Coach., P. King, Vol. Asst.

Coach's Corner:

"I enjoyed this team because they played hard through the problems... This season has established a base to build on next year."

After losing some of their edge when it comes to making the three-point shot, the men's basketball team struggles to bounce back for next year.

THREE point blues

If you live by the three, you die by the three. It's an old cliché, but it is an accurate one. And it's one that describes the men's basketball team very well.

Head coach Rick Scruggs, who just completed his third season at Gardner-Webb, has two distinct coaching philosophies: shoot the three and apply pressure on defense. Unfortunately, when the threes aren't falling, it makes pressure defense impossible.

The past two seasons, GWU has taken over 1,200 three pointers, easily the most in the South Atlantic Conference.

This season was definitely a roller-coaster ride with highs such as a one-point road win at Carson-Newman, and lows like a nineteen point home loss to Lenoir-Rhyne.

One constant for the Bulldogs this past season was forward Dusty Mason. Mason led the team in scoring and three point shooting after sitting out 1996-97 with an injury.

"I look for Dusty to be one of the conference's best players for the next couple of years," Scruggs said.

Inside, Rodney Smith finished up his career at GWU with a bang. Smith was among the team leaders in rebounding and shot-blocking, and he gave 100 percent every time out.

Jermel Perry and Tremayne Booker also finished

up their GWU careers with good rebounding numbers inside for the Runnin' Bulldogs.

Three point specialist Travis Sensabaugh was feast or famine during his senior season. Sensabaugh would have games where he couldn't miss—and he had a few in which he was not as fortunate. Still, he will be remembered as one of the most exciting players in school history.

Although the team didn't enjoy the type of success this season that Bulldog fans have grown accustomed to, the future is bright.

Marcus Connelly, a 5' 11" point guard from nearby Morganton, played significant minutes as a freshman for the Bulldogs. Connelly had a fine season against some very talented point guards in the SAC, and he will have to step up his game even more next season.

"Marcus has the ability to be one of the best players in the conference. He handles the ball extremely well, and he's also an excellent shooter," Scruggs said.

Damian McMillian, Corey Rodgers and William Hawkins all had solid seasons, and any success that Coach Scruggs has with this squad next season will depend on this group of players.

If a couple more three pointers fall next season, who knows how far this team will go.

With a top-notch returning trio and a new foundation of outstanding freshmen players, the 1997 team quickly made a name for themselves among SAC competitors.

QUEENS of the court

From high school to school to college, it is a change that all freshmen face. For freshman volleyball players it was not only the academic change but the level of competition changes as well.

Volleyball affected the individual both physically and mentally. "Volleyball is a mental game. If you get blocked, you can't get discouraged; otherwise you'll get blocked all night," says returning player Heather Hauser.

Another transition that volleyball players went through was the struggle of keeping up their grades and still making a great performance on the volleyball court.

With her speed and strength, Linette Ramseur spikes the ball against the Mars Hill Lions. Ramseur, a freshman from Vale, North Carolina, helped lead her high school volleyball team to back-to-back N.C. AAA State Championships while at Fred T. Foard High.

(PHOTO BY RICHIE ELLISON)

"Volleyball is a mental game. If you get blocked, you can't get discouraged; otherwise you'll get blocked all night."

--Heather Hauser

Trisha Beatty, a nursing major and a starter for the team said, "It is very difficult to keep up with homework and volleyball at the same time."

But no matter how demanding the homework or practice got, the team pulled together for a royal finish. Despite hosting the SAC playoffs in November, the ladies showed no mercy on the court.

The hard work and sacrifices made in the regular season paid off on Saturday, November 15 as team members were crowned queens of the court.

By improving and combining their physical, mental, and spiritual abilities, the women's cross country team succeeds.

GETTING in the race

To be a team, members must pull together as a single unit, and there are many ways to accomplish this.

Physically the runners needed strength, endurance and speed. Mental focus and emotional strength developed through the support of team mates. And without spiritual strength the physical and mental components could not be accomplished.

Women's cross country team members worked on each element required for the unity of their team.

Daily training routines built endurance and strength.

Team members supported each other during practice and at every meet. Spiritual unity came through team prayer.

According to Christina Cox, "Before every race we pray as a team for strength and perseverance to make it through."

Through team unity, Emily Harrelson and Christina Cox won Academic All-American awards and the team placed fifth in the conference.

by Cindy Lee

I run as hard as I can and am always determined to do my best, but there is no way I could do it without God.

STRESSING the priorities

Although they did not have a significant season, the men's cross country team were given life-long lessons on priorities.

Pounding the pavement day after day, the men's cross-country team kept the faith, despite the loss of last year's two top runners.

The team lost All-Conference Chris Hendricks and number one seed Rob Stephens.

Rather than caving into the mind set that the season was lost without Chris and Rob, the runners worked hard and stepped up their performance.

The team's hard work and dedication landed them a fourth place finish in the conference, despite not having Phil Kramer run with them at one meet.

Walter Miller was named to second team All-American who averaged thirteenth in his finishes.

Anticipating the starting signal, Frank Spurlock and Phil Kramer have determined looks that victory will be waiting for them at the finish line. (PHOTO BY GARRY ELLER)

The team which consisted of seven runners became extremely close throughout the season. Phil Kramer said, "I enjoyed the comradie most of all. It was great to be a part of something again."

One reason for such a good season was the encouragement of Coach Dick Wince.

Several runners praised Coach Wince for stressing academics before athletics.

As Benjamin McCreary said, "Coach Wince stressed God, academics, and sports, in that order." Wince's devotion to God and academics was just one lesson which served the team in the bigger race of life.

by Cindy Lee and Mandy Ellison

"At every practice, cross country or wrestling, Coach Wince either has a prayer or a devotional thought."

WHOLE in one

Working together
new coach,
freshmen, and
returning players,
created a unified
team.

For the first time ever, the men's
golfteamwascoachedbyawoman,
Millie Keeter-
Spangler.

When the team dis-
covered that the new coach
was a woman, they had a
few concerns.

But by year's end
the team --five returning
playersandfivefreshmen
members had changed
their minds.

Focusing on technique, Coach
Keeter-Spangler worked one-on-one with
each member. She also en-
tered the team in as many
tournaments as possible in
order to give them experi-
ence and practice.

As coach and team
got acquainted, all con-
cluded that the team's
outlook was positive.

Before facing a crowd of fans, cheerleaders endured the same training and discipline as other sports teams.

ACTION on the side

Pulled hamstrings, fingers out of sockets, bruises, sprains. Although this sounds like a description of the football team, this action also happens on the sidelines.

Practices began two weeks before other students came to school and included a weekend camp at Myrtle Beach, South Carolina. The next six to eight weeks were also spent in practice. Other regulations included weigh-ins every Tuesday to make sure no one gained or lost too much weight.

Cheerleading is now being considered and appreciated as a formal sport, much to the approval of Troy Powell. "Like volleyball or other sports, we compete, practice, and show off our

skill. It takes skill and it is very hard to master or even get good at cheerleading."

Annie Tallent agreed by saying, "Cheerleading involves a great deal of physical activity. We have to run a mile, do sit-ups, and push-ups before every practice."

Gardner-Webb cheerleaders also received more attention as entertainers. Besides cheering at football and basketball games, they also performed at the Cleveland County

Fair, the Cleveland Mall, and at local parades.

Despite the injuries, the hard work is worth it when the crowd joins in to cheer.

by Lizabeth Nestlerode

Like volleyball or other sports, we compete, practice, and show off our skill.

Coach's Corner:

"They are as good as any team in the nation. I'm extremely proud of the team and the coaches. I hope that the excitement and attitude will carry over in to the coming years."

BREEDING a new kind of dog

Coach Steve Patton, in his first year at GWU, transformed the team into a finely-tuned winning machine.

The 1997 Runnin' Bulldog's media guide was entitled "A New Breed of Dog." Let's just say that the 1997 season was a case of life imitating art.

First-year Coach Steve Patton and his staff brought a new attitude and some much-needed enthusiasm to the program.

Patton led the team to one of the biggest turn-arounds in school history, improving the previous 2-9 record to an 8-3 mark.

But Patton and his staff were quick to point out that the players themselves were most responsible for the smooth transition to a winning program.

One reason for the improvements was the potent rushing attack. Coach Patton rotated his running backs to confuse opposing defenses. As a result, Amos Myles, CoCo Henderson and Charles Palmer all rushed for over 400 yards on the season. The group also averaged nearly five yards per carry.

Like most good teams, the Running Bulldogs had a stingy defense. Defensive Coordinator Will Holthouser's unit allowed fewer than 20 points in seven

games this season. First-team all conference selection Bo Shannon was the leader of the "hit squad." From his middle linebacker position, Shannon covered the entire field and he was the team leader in tackles.

Perhaps the biggest improvement was in special teams. Punter Trey Greene was an all-conference pick, averaging over 42 yards per kick, while place kicker Ryan Cieslak was much improved in his sophomore season. Cieslak was instrumental in an overtime win on the road against Presbyterian. Cieslak nailed three field goals, including the game-winner.

Kareem Jordan was another force on special teams. In addition to playing cornerback on defense, Jordan scored a touchdown on both a kickoff and a punt return. Jordan averaged 30 yards per return on kick-offs and 19 yards per return on punts.

With the success of this season under their belts, Coach Steve Patton and his Runnin' Bulldog Football team are definitely going places--and they might get there in a hurry.

by Randy Capps

With the Tusculum defense hot on his tail, quarterback Clint Conner struggles to gain yardage. Despite being held back in this play, Conner ended the season with 106 attempts for 197 yards, four touchdowns, and an average of 1.86 yards per carry. (PHOTO BY GARRY ELLER)

NO PLACE like home

The women's soccer team loses a comfortable standing in the conference after losing too many games away from home.

The women's soccer team started the season off with four straight losses, but elevated their play and woneight of the next fourteen games.

Despite an outstanding home record of 6-1, the team ended up with an 8-11 overall record. Their South Atlantic Conference record consisted of two wins and five losses.

The team shut out Mars Hill 4-0 and creamed Newberry 6-1.

Liz Stojetz returned from a knee injury, became captain, and stepped up as a leader.

In the SAC tournament, they competed against Catawba in the first round and lost 2-1;

Catawba went on to win the tournament.

Coach Lennox Charles commented on the season by saying, "Consistency was a problem. We had a good home record, but could not keep it up during road games."

Unfortunately, Charles stated that next year's team will lack depth. "The team will consist of twelve freshman and sophomores, five juniors, and two seniors," he said.

After two consecutive seasons of less than perfect results, the team looks to next year to rebuild and to become more comfortable playing away from home.

The men's soccer team faced numerous injuries at a crucial time which hindered their season's success rate.

MISSING in action

Despite the loss of the eight starters, including All-American Jerome Lee Yaw and goalie Brooks Derrick, the men's soccer team came into the season and played the season with a positive attitude.

The team won five games, lost twelve, and tied twice overall.

In the South Atlantic Conference, they dominated Newberry with a 9-0

shutout and persevered against Carson Newman to pull off a 2-1 defeat.

Unfortunately, the lack of depth and the consistent injuries kept the team from advancing past the first round in the conference tournament. In fact, only sixteen out of the twenty-eight players were eligible to play in the conference

After a grueling loss to the Catawba Indians, the exhausted Bulldogs walk off the field. (PHOTO BY RICHIE ELLISON)

match due to injuries.

The team played Wingate on the first round of the tournament, but lost the match 2-3 in a dramatic overtime.

Vince Bueno, the 1996 SAC Freshman of the Year, became a leader on the field, but no one else stepped up to contribute, leaving spectators wondering if the other players were missing in action.

Coach Tony Setzer said, "Bueno will be one the best players to ever play here."

Setzer said about the season, "I am proud of my players for fighting, working through adversity, and doing what each was supposed to do."

"I am proud of my players for fighting, working through adversity, and doing what each was supposed to do."

Coach's Corner:

"I learned that these were the types of players I want on my team."

AT HOME on the field

International athletes make numerous sacrifices to come to the United States and play sports.

Bjorn Bernhardt and Jill-Ann Nicome were just a couple of the athletes foreign to the U.S. but very much at home on the tennis court or soccer field.

Bernhardt came from Sweden on a tennis scholarship. He surveyed different schools through their brochures to find the ones that offered tennis scholarships. He inquired about this program after reading the brochure.

Bernhardt sent a video of some of his matches for evaluation by the coaching staff. The staff liked what they saw and recruited him. He said, "I am very happy here and I am glad that I chose GWU."

Jill-Ann Nicome was recruited to play on the Lady Bulldogs soccer team. She came from the Carribean. The staff watched her in action and were pleased with her performance. She said, "People here seemed friendly and I felt welcome."

What made these and other international athletes different from American athletes, besides

the obvious, was the added pressure to adjust. Homesickness overcame many of these athletes.

Sure, being homesick is common to all athletes and students, but just think if your home were thousands and thousands of miles away. International athletes' adjustment to this feeling was much more extreme. They had to grin and bear it when those lonely feelings hit. Jill-Ann Nicome said, "It was terrible the first year, but it got a little easier each year."

Athletes thrived on fan support, especially when the fans were family members. With the knowledge that their family was sitting in the stands cheering them on, some quite vocally, the players were able to give that extra effort in every aspect of their game. For international athletes, family rarely had the opportunity to see their son or daughter play.

Having the opportunity to play a sport that one really loved made the homesickness worth it.

YOUNG LOVE on the court

Although they were a young team, the women's tennis team made plans to be a top-notch competitor.

During their fall season, the women's tennis team demonstrated their readiness for the spring season.

At the Rolex Tournament, the entire team made it past the second round, and Hagar Levy, a transfer from Tulsa University, placed second in her flight.

The team had high expectations

on the court

with five freshmen and four returning members. Such expectations were reinforced by the training schedule which consisted of dawn jogs and Sunday-Saturday practice sessions.

Despite the rigorous training, Kellie Johns anticipated a successful year "because our talent is spread

by Julie Ortiz

Our talent is spread evenly.

--Kellie Johns

evenly."

The women's tennis team started every practice with a warm-up run and stretch. Every practice ended with a cool down run and stretch. Each member worked to be in good shape for the Spring Season.

(PHOTO BY RICHIE ELLISON)

After finishing third in the SAC conference last year, the men's tennis team hopes to climb another rung or two on the conference ladder.

GREAT expectations

With eight players returning from last season's squad, the Runnin' Bulldog tennis team is taking aim at a conference title.

Coach Andy Smith's team finished third in the conference tournament last spring, and now the expectations are somewhat higher.

"Our goal is to win the conference and to go to regionals. I think that's very realistic," Smith said.

The men enter the season ranked eleventh in the NCAA Division II Eastern Region. It's the highest ranking the team has held in Smith's tenure.

This may also be the best group of players he's ever had.

Sophomore Murray Wellington is ranked nineteenth in the East region and will provide stability at the top of the lineup. Wellington, a native of Australia, was an all-conference selection as a freshman and he will have to repeat last season's performance for this team to reach its goals.

Adding firepower and experience to the lineup will be Jason Allen. Allen, a junior from Palatka, Florida, is coming off surgery to remove a cyst from his wrist. Smith hopes to have him

back in action by Spring Break. The Bulldogs are a much tougher team with him in the lineup.

Bjorn Berhardt, a native of Sweden, has injury problems of his own. He had his appendix removed in the off season, and he is back just in time for the start of the '98 campaign.

Joe Harwell, Brad Burgess and Mitch Lake will be looked upon to add experience and depth to the lower half of the Bulldog squad.

With the early season non-conference schedule this unit will face, toughness will be a necessity. The Bulldogs will face High Point, UNC Asheville and Anderson College—all traditional tennis powers.

"We've got a tough schedule, but I expect this team to do well," Smith said.

Life doesn't get any easier within the South Atlantic Conference. Presbyterian, last year's champion, is widely considered to be the front-runner. Close behind will be GWU, Carson-Newman, Mars Hill and Wingate.

"The conference race is basically up in the air," Smith said.

If this team can stay healthy and catch a few breaks, it just may land in Boiling Springs.

Wrestling Team

Front Row: B. Mobley, G. Gori, B. McCrary, K. Washington, D. Dukes, A. Baker, R. Whitmore, J. Watson, S. Chenevey, E. West, J. Kothimer. Second Row: M. Kirkman (trainer), N. Osteen, S. Short, K. Wince, G. Fox, J. Rhodes, M. Dye, J. Hyler, J. Home, M. Barton, B. Blow, W. Salahuddin, Coach Dick Wince, M. Myers (stat.), C. Cox (stat.). Third Row: C. Wilhelm, J. Morris, S. Ledford, J. Short, J. Dinardo, R. Cox, P. Scott, B. Dawley.

Coach's corner: "This is the best freshman class we've ever had, and they seem to have accepted the fact that they have to pay their dues. They have all the skills, the biggest thing is physical maturity."

PAYING their dues

Facing major league schools, the wrestling team, with a majority of freshmen, to go for a national champions

T rue or False: Most students who participate in athletics at GWU are on full scholarship.

Answer: False.

Wrestling, for example, has just one full scholarship to spread among the team members. There are 27 wrestlers on the roster—do the math.

Don't shed any tears for Coach Dick Wince. There were other ways to get good athletes. Through diligent recruiting, he had the nucleus in place for a very bright future for the Runnin' Bulldogs.

Then again, he wasn't exactly starting from scratch. James Short returned for his junior season on the mat for the Bulldogs. Short was an NCAA Division II All-American during the 1997.

Junior Rich Cox and fifth-year senior Pete Scott will be counted on to provide leadership for an otherwise young and inexperienced squad.

"On any given night, we will have five or six freshmen in the starting lineup. And we have had as many as eight," Wince said.

One of the future stars of this incoming class was Kenny Wince. Being the coach's son

provided him with years of extra experience and one-on-one training.

In addition to his exploits on the mat, Wince was also a Presidential Scholar, as were Scott Chenevey and Benjamin McCrary.

Other newcomers included Steven Short,

James' younger brother, George Gori and Justin Horne.

This squad paid its dues facing wrestlers from schools like UNC, N.C. State, The Citadel and Carson-Newman, these freshmen learned valuable lessons against some major league competition.

It would have been easy for Wince to label this a rebuilding year and setup a cupcake schedule, but there was a master plan at work for the program.

There is a saying that goes: The best thing about freshmen is that next year, they'll be sophomores.

When these freshmen come of age, there's no telling what this team can achieve with just one scholarship.

by Randy Capps

"I could schedule a winning season every year, but that wouldn't help us reach our goal of a national championship somewhere down the road."

Dick Wince

Using Peterson's move, George Gori tries to regain control of his opponent.. Although Gori was a newcomer to the team, he was often given a chance to compete. (PHOTO BY GARRY ELLER)

Trainers Lynn Gantt and Mary Kirkman observe Rebekah Kirkman in the training room. According to statistics provided by the National Athletic Trainers' Association, more than half of the nationally certified trainers have been women. (PHOTO BY GARRY ELLER)

The school's athletic trainers are the first line of defense in athletic training are the first line of defense in athletic injuries. Trainers can treat, evaluate, and rehabilitate."

--Larry Brey

PUTTING theory into practice

Preventing injuries for the sports teams gives athletic trainers hands-on training for the future.

Team travel. Long days. Hectic schedules. Such is the life of a student in the Athletic Trainer's program.

Freshmen and sophomore students in the new major spend their time assisting and observing trainers. In their remaining years, the students are a part of an athletic team.

The student athletic trainer must accompany the team at practice, and be at every game. Trainers may miss classes while traveling with the team and must work hard to stay caught up on schoolwork.

Participants in the program must complete 1500 hours of internship during their four years, most of which is accomplished by working with the athletic teams.

The training program is a combination of academics and athletics. Students spend their mornings in classes and then go to the training room for several hours.

Students work under Certified

Athletic Trainers (ATC). After completing the program, they may take a test administered by the National Athletic Trainers' Association Board of Certification to receive national certification. If he/she passes the student is a Certified Athletic Trainer.

Students majoring in Athletic Training also take a minor in the field in which they want to work. Certified Athletic Trainers have job opportunities in high schools, colleges and universities, sports medicine, clinics, professional sports programs, and other health care settings.

By providing services to the athletic teams, the athletic trainers not only protect the players, they also get a chance at hands-on learning.

"The most interesting aspect of being an athletic trainer is to watch someone that has had surgery go from not being able to walk to being able to run and jump. It is great to see the excitement that is produced from a 'cured' person," said Ewell Vernon.

Future curriculum changes. University commons.

SAC Volleyball champions. Despite all the new faces and changes appearing around campus,

life moved on

and the school continued to grow. Enrollment in every program increased and plans were

developed for a new Fine Arts center, as well as a new Wellness Center. The new Marriott Food

Service adjusted menus and Doug Searcy made changes in the room sign-up policy. Admissions

counselors hunted the country for top-notch students, while Dr. White traveled half-way across the

world to cement an exchange program with the Moscow State Conservatory, all steps towards accom-

plishing the goals set in the university's "Vision for the Twenty-first Century."

by Amy Tarlton

Enjoying the sweet taste of victory, the women's volleyball team celebrates after winning the SAC Volleyball tournament. With a championship under their belts, the team took a break, then went back to work, training and recruiting for the next season. (PHOTO BY GARRY ELLER)

The sun setting behind Lake Hollifield scene indicates the changes across campus. The carillon has become an important part of campus life, keeping faculty and students aware of the changing times, on and off campus. (PHOTO BY GARRY ELLER)

On the quad, in the classroom, or in the sports arena, students were always changing and evolving. (PHOTOS BY STAFF AND RICHIE ELLISON)

transitions

The 1998 WEB was published by the 1998 WEB Yearbook Staff at Gardner-Webb University in Boiling Springs, NC. Trim size was 9 x 12 with a press run of 1050 copies.

The cover featured 3 photographs tipped on to an embossed panel with White silkscreen paint applied to a Snow Cloud base material. French Straight was the selected grain, Endsheets were design with black ink applied to a White Vibra Color endsheet stock. An 80 lb. Bordeaux gloss enamel paper stock was used throughout the book.

Times Roman was used for all body and caption copy with headline fonts varying in each section. The book was created on MacIntosh computers using PageMaker 5.0 with Herff Jones Pagemaster templates. The 1997 WEB received a Silver Medalist award with All-Columbian Honors from Columbia Scholastic Press Association in New York. The book was also selected by Herff Jones Yearbooks as a national sample.
